Functional Family Therapy For Adolescent Behavior Problems:

Functional Family Therapy for Adolescent Behavior Problems James F. Alexander, 2013 This book explains how to provide Functional Family Therapy FFT a highly successful family intervention for delinquent and substance using adolescents FFT systematically alters important risk and protective factors associated with the problem behaviors

Functional Family Therapy for Adolescent Behavior Problems James F. Alexander, Holly Barrett Waldron, Michael S Robbins, Andrea A Neeb, 2015-05-09 Adolescents with behavior problems go by various labels such as difficult to treat adolescents juvenile delinquents at risk youth violent youth and youthful offenders They may have disruptive behavior disorder or substance abuse disorder and they may be involved with the criminal justice system These youth have problematic behaviors emotions and ways of thinking that often affect not only their families but also their community These youth their families and their successful treatment represent the focus of this book Although family members are often dissatisfied with the youth s behavior and intensely focused on the need for him or her to change the youth rarely self refers and often seems undisturbed by his or her own behaviors and is typically unmotivated for treatment At the same time parents and other family members seem heavily invested in viewing problems in the family as resulting from the adolescent s bad behavior Therefore some family members also are unmotivated or unwilling to be involved in the youth s treatment Given the multifaceted barriers to adaptive change treatment is needed that addresses the entire family system in a holistic way Over the past 40 years numerous researchers and clinicians have developed tested and refined Functional Family Therapy FFT a short term structured intensive family intervention model for delinquent and substance using adolescents FFT is a strength based model with a focus on those risk and protective factors that impact the adolescent and his or her environment On average 12 sessions are conducted over a 3 to 4 month period These sessions typically occur in clinics and home settings but can also be conducted in schools mental health agencies child welfare agencies probation and parole offices and aftercare systems We have written this book with the clinician in mind We often maintain a quite personal tone because we want to share and talk with you rather than taking a more traditional academic tone by talking to you Often we use examples of specific youth and families with disguised identities of course so clinicians can experience the clinical reality of these youth and families We describe not only the goals of each intervention strategy and technique but also the specific steps and variations that are involved and necessary for success At the same time because FFT also derives strength from our history of widespread dissemination and training we also share information relevant to decision makers program administrators clinical supervisors clinical researchers and even legislatures who have the responsibility of how best to allocate funds to provide the most effective services In the remainder of this Introduction we discuss FFT s conceptualization of change as a developmental process and outline the five major treatment phases of FFT Then we explain the organization of this book As we describe the FFT phases and the techniques and therapist qualities involved in each our strategy in this book is to move

from a broad focus to a narrow focus then back again to a broad focus Introduction PsycINFO Database Record c 2013 APA all rights reserved

Handbook of Adolescent Behavioral Problems Thomas P. Gullotta, Robert W. Plant, Melanie A. Functional Family Therapy for High-Risk Adolescents James F. Alexander, 2014-02-01 In Functional Family Therapy for High Risk Adolescents James F. Alexander demonstrates his approach to working with families that have teenage children exhibiting behavior issues and associated emotional disruptions Teens with behavior problems are one of the most difficult populations with whom therapists work as adolescents and their families frequently enter treatment against their will either under legal order or at strong insistence of authority figures such as school administrators Family interactions can be hostile and a sense of hopelessness is not uncommon Dr Alexander's approach involves working to increase family motivation to change by disrupting negative attributions they may have about themselves and other family members and replacing these with more positive and adaptive attributions In this video Dr Alexander works with a mother father and their 15 year old son who has been exhibiting behavior problems such as drug use and school truancy and who has recently been charged with breaking and entering The session focuses not only on the son but also the mother and father whose relationship has been under significant strain for years due to the mother's own substance use and frequent disappearances from the family This DVD features clients portrayed by actors on the basis of a composite of several cases

Family-Based Intervention for Child and Adolescent Mental Health Jennifer L. Allen, David J. Hawes, Cecilia A. Essau, 2021-03-11 The most effective treatments for child and adolescent psychopathology are often family based emphasising the active involvement of family members beyond the referred individual This book details the clinical skills knowledge and attitudes that form the core competencies

for the delivery of evidence based family interventions for a range of mental health problems Offering practical case studies to illustrate treatment principles and discussing barriers to treatment and problem solving in relation to common difficulties Covers topics such as anxiety attention deficit hyperactivity disorder sleep and eating disorders Therapist competencies are thoroughly examined from the role they play in severe complex cases and in achieving successful outcomes to commonly misunderstood aspects of family based interventions and how they can be enhanced Clinical approaches to working with diverse families and those of children affected by parental psychopathology child maltreatment and family violence are also explored Essential reading for psychologists psychiatrists paediatricians mental health nurses counsellors and social workers

Family-Focused Treatment for Child and Adolescent Mental Health Paul Sunseri,2023-12-22 This book is designed as a treatment manual for using family based treatments with children struggling with mental illness supporting both family therapists and the families they are helping Based on over 40 years of research it has been shown that involving the entire family in treatment is effective However family therapy is still not used as a first line of treatment Paul Sunseri explains and explores why family based approaches should be used with struggling young people and how this can be applied in practice Chapters discuss the causes contributors and social determinants for the rise in childhood mental illness and provide empirical evidence and treatments for working with children and adolescents suffering from self harm suicidal ideation anxiety anger and depression Filled with case studies throughout the book also touches on mitigating the effects of screen time in our increasingly technological lives and interventions to help reluctant children participate in therapy This book will be invaluable reading for graduate level students clinicians in training and fully licensed clinicians such as psychologists psychiatrists marriage and family therapists and clinical social workers The book is also a practical resource for parents and other caregivers it pulls back the curtain on therapy and teaches parents exactly what to do to best love and support their child at a time when they need it the most

Functional Family Therapy in Clinical Practice Thomas L. Sexton,2011-01-19 Functional Family Therapy in Clinical Practice develops a comprehensive presentation that serves as a systematic guide to understanding the Functional Family Therapy FFT clinical model the FFT service delivery system the theoretical principles that serve as the foundation of FFT and the mechanism of therapeutic change that gives FFT its potency Clinically relevant theoretically sound and scientifically based this book contains systematic discussions of topics and theoretical perspectives as well as illustrative clinical examples that demonstrate the manner in which principles are applied in Family Focused Therapy

Handbook of Family Therapy Thomas L. Sexton,Jay Lebow,2015-12-07 Integrative research based multisystemic these words reflect not only the state of family therapy but the nature of this comprehensive handbook as well The contributors all well recognized names who have contributed extensively to the field accept and embrace the tensions that emerge when integrating theoretical perspectives and science in clinical settings to document the current evolution of couples and family therapy practice and research Each individual chapter contribution is organized around a central theme

that the integration of theory clinical wisdom and practical and meaningful research produce the best understanding of couple and family relationships and the best treatment options The handbook contains five parts Part I describes the history of the field and its current core theoretical constructs Part II analyzes the theories that form the foundation of couple and family therapy chosen because they best represent the broad range of schools of practice in the field Part III provides the best examples of approaches that illustrate how clinical models can be theoretically integrative evidence based and clinically responsive Part IV summarizes evidence and provides useful findings relevant for research and practice Part V looks at the application of couple and family interventions that are based on emerging clinical needs such as divorce and working in medical settings Handbook of Family Therapy illuminates the threads that are common to family therapies and gives voice to the range of perspectives that are possible Practitioners researchers and students need to have this handbook on their shelves both to help look back on our past and to usher in the next evolution in family therapy **Functional Family**

Therapy James Alexander, Bruce V. Parsons, 1982 For decades following Alfred Adler's pioneering work in the 1920s family therapy enjoyed only a minor or adjunct role among the various treatment approaches in the field of mental health Recently however family therapy has experienced phenomenal growth in impact and popularity The functional family therapy approach described in this book a synthesis of interpersonal behavioral and systems orientations represents a new evolutionary step in the treatment of families It is based on the substantial works of our predecessors and the experience derived from many hours of seeing families in both clinical and research contexts The goal of this book is to provide a clear description of the procedures and structure necessary for the successful practice of family therapy Family therapists need an unambiguous conceptual framework and a set of specific techniques for dealing with families in distress At the same time however they cannot succeed if they are merely technicians For this reason the book is also designed to enhance the flexibility and creativity therapists need to respond effectively to the myriad needs idiosyncrasies and forms of resistance presented by the different families they see To this end much of the material in the book is presented in a somewhat intuitive manner often by example and analogy Part One describes the functional family model as it generally applies to all families including the specific conceptual technical and interpersonal skills required of all family therapists Conceptual skills comprise the perspectives therapists need to understand families as well as the knowledge necessary for developing appropriate therapeutic goals and selecting suitable techniques Technical skills include the verbal nonverbal and physical tools that therapists use as vehicles of change They represent the technology of what therapists do based on their conceptual understanding of what needs to be done Interpersonal skills represent the way therapists apply their techniques The efficacy of the techniques depends significantly on the atmosphere and family attitudes created through these interpersonal skills Part Two is designed to facilitate therapists flexibility by describing each of the phases of intervention with emphasis on the goals of each phase rather than on the specific techniques Part Two also describes a number of unique developmental and

structural aspects of particular families that require specific techniques Preface PsycINFO Database Record c 2008 APA all rights reserved
