The Genesis of Technoscientific Revolutions Venkatesh Narayanamurti, Jeffrey Y. Tsao, 2021-11-16 Research powers innovation and technoscientific advance but it is due for a rethink one consistent with its deeply holistic nature requiring deeply human nurturing Research is a deeply human endeavor that must be nurtured to achieve its full potential As with tending a garden care must be taken to organize plant feed and weed and the manner in which this nurturing is done must be consistent with the nature of what is being nurtured In *The Genesis of Technoscientific Revolutions* Venkatesh Narayanamurti and Jeffrey Tsao propose a new and holistic system a rethinking of the nature and nurturing of research They share lessons from their vast research experience in the physical sciences and engineering as well as from perspectives drawn from the history and philosophy of science and technology research policy and management and the evolutionary biological complexity physical and economic sciences Narayanamurti and Tsao argue that research is a recursive reciprocal process at many levels between science and technology between questions and answer finding and between the consolidation and challenging of conventional wisdom These fundamental aspects of the nature of research should be reflected in how it is nurtured To that end Narayanamurti and Tsao propose aligning organization funding and governance with research embracing a culture of holistic technoscientific exploration and instructing people with care and accountability
