Grounded Vision William H. Major, 2011-04-13 In *Grounded Vision* William Major puts contemporary agrarian thinking into a conciliatory and productive dialogue with academic criticism He argues that the lack of participation in academic discussions means a loss to both agrarians and academics since agrarian thought can enrich other ongoing discussions on topics such as ecocriticism postmodernism feminism work studies and politics especially in light of the recent upsurge in grassroots cultural and environmental activities critical of modernity such as the sustainable agriculture and slow food movements

Deep Agroecology and the Homeric Epics John W. Head, 2020-12-15 Drawing on the Homeric epics this multidisciplinary work reveals the cultural transformations which need to take place in order to transition from today s modern extractive agricultural system to a sustainable natural systems agriculture In order to provide an imaginative foundation on which to build such a cultural transformation the author draws on the oldest and most pervasive pair of literary works in the Western canon the Iliad and the Odyssey He uses themes from those foundational literary works to critique the concept of state sovereignty and to

explain how innovative federalism structures around the world already show momentum building toward changes in global environmental governance The book proposes a dramatic expansion on those innovations to create eco states responsible for agroecological management Drawing from many years of experience in international institutions the author proposes a system of coordination by which an international agroecology focused organization would simultaneously i avoid the shortcomings of the world s current family of powerful global institutions and ii help create and implement a reformed system of local landscape based agriculture wholly consistent with ecological principles Acknowledging the difficulty of achieving reforms such as these the author suggests that a new cultural conceptual narrative can be constructed drawing on values set forth 2 700 years ago in the Homeric epics He explains how these values can be reimagined to drive forward our efforts in addressing today s the climate and agricultural crises in ways that reflect not reject the natural processes and relationships that make the Earth a living planet This book will be of great interest to students academics and policymakers addressing issues of agrarian values environmental and agricultural law environmental restoration agroecology and global institutional reform

Factories in the Field Carey McWilliams, 2000-04-15 Dramatizing the misery of the dust bowl migrants hoping to find work in California agriculture this text starts with the scandals of the Spanish land grant purchases and goes on to examine the experience of ethnic groups that have provided labour for California s agricultural industry

The Philosophy of Food David M. Kaplan, 2012-01-07 This book explores food from a philosophical perspective bringing together leading philosophers to consider the most basic questions about food Each essay analyses many contemporary debates in food studies Slow Food sustainability food safety and politics and addresses such issues as happy meat aquaculture veganism and table manners

Hunger for the Wild Michael L. Johnson, 2007 Americans have had an enduring yet ambivalent obsession with the West as both a place and a state of mind Michael L Johnson considers how that obsession originated how it has determined attitudes toward and activities in the West and how it has changed over the centuries

Trojan Horses Page DuBois, 2001-03-01 A passionate reexamination of the ancient world and the lessons we can draw from antiquity In today s turbulent cultural moment it is all too common for conservatives to invoke the wisdom of the ancient Greeks in the name of timeless virtues At the same time critics have charged that multiculturalists have hopelessly corrupted the study of antiquity itself and that the teaching of Classics is dead *Trojan Horses* is Page duBois s answer to scholars and theorists such as Camille Paglia Allan Bloom and William Bennett who have appropriated antiquity in the service of a conservative political agenda She challenges cultural conservatives appeal to the authority of the Classics by revealing their presentation of ancient Greece as simplistic ahistorical and irreparably distorted by their politics In its devastating critique of these pundits *Trojan Horses* presents a more complex and more accurate view of ancient Greek politics sex and religion In her incisive examinations of figures such as Daedalus and Artemis duBois eloquently conveys their complexity and passion but also unearths actions and beliefs that do not square so easily with today s conservative values As

duBois writes Like Bennett I think we should study the past but not to find nuggets of eternal wisdom Rather we can comprehend in our history a fuller range of human possibilities of beginnings of error and of difference In these chapters duBois offers readers a view of the ancient Greeks that is more nuanced more subtle more layered and in every way more historical than the portrait many of today s scholars strive to display in our classrooms Sharp timely and engaging Trojan Horses portrays the richness of ancient Greek culture while riding in to rescue the Greeks from the new barbarians **The Agrarian Roots of Pragmatism** Paul B. Thompson, Thomas C. Hilde, 2000 Critically analyzes and revitalizes agrarian philosophy by tracing its evolution Today most historians philosophers political theorists and scholars of rural America take a dim view of the agrarian ideal that farmers and farming occupy a special moral and political status in society Agrarian rhetoric is generally seen as special pleading on the part of farmers seeking protection from labor reform and environmental regulation while continuing to receive direct payments and subsidies from the public till Agrarianism should not be viewed as a set of immutable claims about farming and political order but as a tradition of moral and political philosophy that has evolved and deepened over the centuries Agrarian naturalism the belief that culture and conduct are conditioned by nature because they are of a piece with nature becomes pragmatic naturalism giving way to a new set of puzzles about how we are to understand the rural landscape and our responsibilities for its use The agrarian idea that personality and sociability are integrated with the material transformation of the landscape can serve as the basis for a new pragmatically grounded ethic of natural resources and rural development The essays in this volume critically analyze and revitalize agrarian philosophy by tracing its evolution in the classical American philosophy of key figures such as Franklin Jefferson Emerson Thoreau Dewey and Royce Three chapters address the belief that farming peoples develop moral virtue and a taste for democracy as it evolved in the American context and four examine how a reconstitution of agrarian themes might invigorate our nation s thinking on environment food and rural development policy The Agrarian Roots of Pragmatism will be of broad interest to scholars of American philosophy rural history history of ideas geography and agricultural or natural resource policy

Cap-com Kent Welton, 2002 **Across the Board** , 1996 **An Autumn of War** Victor Davis Hanson, 2002-08-13 On September 11 2001 hours after the terrorist attacks on New York and Washington the eminent military historian Victor Davis Hanson wrote an article in which he asserted that the United States like it or not was now at war and had the moral right to respond with force An Autumn of War which opens with that first essay will stimulate readers across the political spectrum to think more deeply about the attacks the war and their lessons for all of us [This Land is Their Land](#) E. G. Vallianatos, 2006 Food is nutrition politics ecology and culture all rolled into one Few would argue that there is a greater need than that of growing food without wrecking society and the land and poisoning the global ecosystem What is necessary is to build this agriculture to the point it can produce enough food for all and repair the social and ecological fabric of the world s countrysides Yet scientific agriculture and agricultural policies ignore or attack the small family farm and peasant

alternatives to conventional farming BOOK COVER *Urbanization of Rural Landscapes* Richard K. Olson,1999 **The Land We Share** Eric T. Freyfogle,2003-08-08 Discussion of a core feature of American life private ownership of land water and other elements of nature What rights do private owners really possess and what responsibilities might society reasonably impose on them Argues that property ownership is an evolving legal arrangement tied to shifting beliefs about community interest book cover The Environmental Ethics and Policy Book Donald VanDeVeer,Christine Pierce,1998 This text and sourcebook crosses disciplinary boundaries and attends seriously to economic reasoning and its implications for environmental policy issues while taking a broad view of questions of ethics It is appropriate and valuable not only for philosophy and environmental science students but also for students of economics biology engineering and public policy

Ripples of Battle Victor Davis Hanson,2003 The effects of war refuse to remain local they persist through the centuries sometimes in unlikely ways far removed from the military arena In *Ripples of Battle* the acclaimed historian Victor Davis Hanson weaves wide ranging military and cultural history with his unparalleled gift for battle narrative as he illuminates the centrality of war in the human experience The Athenian defeat at Delium in 424 BC brought tactical innovations to infantry fighting it also assured the influence of the philosophy of Socrates who fought well in the battle Nearly twenty three hundred years later the carnage at Shiloh and the death of the brilliant Southern strategist Albert Sidney Johnson inspired a sense of fateful tragedy that would endure and stymie Southern culture for decades The Northern victory would also bolster the reputation of William Tecumseh Sherman and inspire Lew Wallace to pen the classic *Ben Hur* And perhaps most resonant for our time the agony of Okinawa spurred the Japanese toward state sanctioned suicide missions a tactic so uncompromising and subversive it haunts our view of non Western combatants to this day New York ,1996-04 **War, Ancient and Modern** Victor Davis Hanson,2007 **The New Book of Popular Science: Technology** ,2004
