Precarious Work Jeff Kenner, Izabela Florczak, Marta Otto, 2019 This discerning book provides a wide ranging comparative analysis of the legal and social policy challenges posed by the spread of different forms of precarious work in Europe with various social models in force and a growing gig economy workforce It not only considers the theoretical foundations of the concept of precarious work but also offers invaluable insight into the potential methods of addressing this phenomenon through labour regulation and case law at EU and national level *Digital Labour Markets in Central and Eastern European Countries* Beata Woźniak-Jęchorek, Kamilla Marchewka-Bartkowiak, 2023-01-19 This book examines the impact of the COVID 19 pandemic on changing labour markets and accelerating digitalisation of the workplace in Central and Eastern Europe It provides an innovative and enriching take on the work experience from the pandemic times and discusses the challenges of ongoing changes in labour markets and workplaces in a way that is not covered by the extant literature The impact of the COVID 19 pandemic and digitalisation on labour market outcomes is analysed throughout 12 chapters by 34 labour market experts from various CEE countries Most chapters are based on empirical methods yet are presented in an easy to follow way to make the book also accessible for a non scientific audience The volume addresses the three key goals to better understand the impact of the COVID 19 pandemic on the adoption of workplace digitalisation in the selected labour markets in CEE countries and the potential trade offs facing those who do and do not have access to this benefit to complement the labour market research by incorporating the outputs of changing demand for skills to contribute new insight into policies and regulations that govern the future of work The book argues that the recent COVID 19 pandemic was a sombre reminder of the relevance and necessity of digital technology for a variety of sectors and market activities It concludes that to downside the risks of vanishing jobs as well as to minimise the threats and maximise the opportunities of digitalisation in CEE countries labour market partners need to consider an effective governance tool in terms of inclusive access to the digital environment re skilling and balanced regulations of the more problematic facets of digital work The book will be of interest to postgraduate researchers and academics in the fields of labour economics regional economics and macroeconomics Additionally due to the broader policy implications of the topic the book will appeal to policymakers and experts interested in labour economics The Introduction Chapters 4 and 12 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *The Politics of Bad Options* Stefanie Walter, Ari Ray, Nils Redeker, 2020-11-12 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations Why was the Eurozone crisis so difficult to resolve Why was it resolved in a manner in which some countries bore a much larger share of the pain than other countries Why did no country leave the Eurozone rather than implement unprecedented austerity Who supported and

opposed the different policy options in the crisis domestically and how did the distributive struggles among these groups shape crisis politics Building on macro level statistical data original survey data from interest groups and qualitative comparative case studies this book argues and shows that the answers to these questions revolve around distributive struggles about how the costs of the Eurozone crisis should be divided among countries and within countries among different socioeconomic groups Together with divergent but strongly held ideas about the right way to conduct economic policy and asymmetries in the distribution of power among actors severe distributive concerns of important actors lie at the root of the difficulties of resolving the Eurozone crisis as well as the difficulties to substantially reform EMU The book provides new insights into the politics of the Eurozone crisis by emphasizing three perspectives that have received scant attention in existing research a comparative perspective on the Eurozone crisis by systematically comparing it to previous financial crises an analysis of the whole range of policy options including the ones not chosen and a unified framework that examines crisis politics not just in deficit debtor but also in surplus creditor countries

Smart Public Procurement and Labour Standards Albert Sánchez Graells, 2018-02-08 Smart procurement aims to leverage public buying power in pursuit of social environmental and innovation goals Socially orientated smart procurement has been a controversial issue under EU law The extent to which the Court of Justice ECJ has supported or rather constrained its development has been intensely debated by academics and practitioners alike After the slow development of a seemingly permissive approach the ECJ case law reached an apparent turning point a decade ago in the often criticised judgments in *Rffert* and *Laval* which left a number of open questions The more recent judgments in *Bundesdruckerei* and *RegioPost* have furthered the ECJ case law on socially orientated smart procurement and aimed to clarify the limits within which Member States can use it to enforce labour standards This case law opens up additional possibilities but it also creates legal uncertainty concerning the interaction of the EU rules on the posting of workers public procurement and fundamental internal market freedoms These developments have been magnified by the reform of the EU public procurement rules in 2014 This book assesses the limits that the revised EU rules and the more recent ECJ case law impose on socially orientated smart procurement and more generally critically reflects on potential future developments in
