Down To The Wire Confronting Climate Collapse:

Down to the Wire David W. Orr, 2009-09-17 The real fault line in American politics is not between liberals and conservatives It is rather in how we orient ourselves to the generations to come who will bear the consequences for better and for worse of our actions So writes David Orr in *Down to the Wire* a sober and eloquent assessment of climate destabilization and an urgent call to action Orr describes how political negligence an economy based on the insatiable consumption of trivial goods and a disdain for the well being of future generations have brought us to the tipping point that biologist Edward O Wilson calls the bottleneck Due to our refusal to live within natural limits we now face a long emergency of rising temperatures rising sea levels and a host of other related problems that will increasingly undermine human civilization Climate destabilization to which we are already committed will change everything and to those betting on quick technological fixes or minor adjustments to the way we live now *Down to the Wire* is a major wake up call But this is not a doomsday book Orr offers a wide range of pragmatic far reaching proposals some of which have already been adopted by the Obama administration for how we might reconnect public policy with rigorous science bring our economy into alignment with ecological realities and begin to regard ourselves as planetary trustees for future generations He offers inspiring real life examples of people already responding to the major threat to our future An exacting analysis of where we are in terms of climate change how we got here and what we must now do *Down to the Wire* is essential reading for those wanting to join in the Great Work of our generation

Transforming Psychological Worldviews to Confront Climate Change F. Stephan Mayer, 2018-11-06 In the continuing debate of how to confront the challenges of climate change individuals advocacy groups and political parties in the United States offer arguments and solutions based on economic and political viewpoints But what if we are beginning from a distorted view In this book F Stephan Mayer argues that our psychological representation of the world is at the heart of the underlying causes of climate change Mayer posits that we need to change the way we see the world if we are to effectively take a new course of action to address this threat Through an alternative worldview based on Aldo Leopold s concept of land ethic Mayer furthers the conversation by promoting a clearer vision of our relationship to nature and how it leads to a different path directed toward environmental sustainability Based on over 20 years of psychological research examining the impact of the land ethic on pro environmental behavior and personal well being Mayer s accessible tone invites readers to place their worldview within a broader framework draw connections to their lives and spark ideas of next steps that individuals and groups can take to transition to this alternative worldview and rectify this situation

Climate Change and Society John Urry, 2011-06-20 This is the first book to develop a proper sociology of climate change and will be an excellent companion to Tony Giddens *The Politics of Climate Change*

America's Environmental Legacies Franklin Kalinowski, 2016-09-16 This powerful book focuses on the capacity of the American political system to respond to ecological challenges through policy perspectives the constraints of our written Constitution and the

determination we must address these tests of national character Put simply this is a book about politics policy and political will Kalinowski brilliantly shows that America's collective will is found in the cultural values enunciated by the Founding Fathers and passed down through history with modifications It comprises the essential missing ingredient in determining how we currently respond to crises Thomas Jefferson Alexander Hamilton and James Madison had distinct ideas concerning the role that Nature might play in the future Recognizing the origins and impacts of their environmental legacies is the key to interpreting where American environmental politics is today how we got here and where we might be headed

Climate Travels Michael M. Gunter, Jr., 2023-03-28 Winner 2023 Choice Outstanding Academic Title Winner 2023 Foreword INDIES Book of the Year Award in the category of Ecology and Environment Foreword Reviews Many accounts of climate change depict disasters striking faraway places melting ice caps fearsome hurricanes all consuming fires How can seeing the consequences of human impacts up close help us grasp how global warming affects us and our neighbors This book is a travelogue that spotlights what a changing climate looks like on the local level for wherever local happens to be Michael M Gunter Jr takes readers around the United States to bear witness to the many faces of the climate crisis He argues that conscientious travel broadens understanding of climate change and makes its dangers concrete and immediate Vivid vignettes explore the consequences for people and communities sea level rise in Virginia floods sweeping inland in Tennessee Maine lobsters migrating away from American territorial waters and imperiled ecosystems in national parks from Alaskan permafrost to the Florida Keys But Gunter finds inspiring initiatives to mitigate and adapt to these threats including wind turbines in a tiny Texas town green building construction in Kansas and walkable urbanism in Portland Oregon These projects are already making a difference and they underscore the importance of local action Drawing on interviews with government officials industry leaders and alternative energy activists *Climate Travels* emphasizes direct personal experience and the centrality of environmental justice Showing how travel can help bring the reality of climate change home it offers readers a hopeful message about how to take action on the local level themselves

Anthropology and Climate Change Susan A. Crate, Mark Nuttall, 2016-03-31 The first edition of *Anthropology and Climate Change* 2009 pioneered the study of climate change through the lens of anthropology covering the relation between human cultures and the environment from prehistoric times to the present This second heavily revised edition brings the material on this rapidly changing field completely up to date with major scholars from around the world mapping out trajectories of research and issuing specific calls for action The new edition introduces new foundational chapters laying out what anthropologists know about climate change today new theoretical and practical perspectives insights gleaned from sociology and international efforts to study and curb climate change making the volume a perfect introductory textbook presents a series of case studies both new case studies and old ones updated and viewed with fresh eyes with the specific purpose of assessing climate trends provides a close look at how climate change is affecting livelihoods especially in the context of economic globalization and the migration

of youth from rural to urban areas expands coverage to England the Amazon the Marshall Islands Tanzania and Ethiopia re examines the conclusions and recommendations of the first volume refining our knowledge of what we do and do not know about climate change and what we can do to adapt [A Climate of Desire](#) Eduardo Sasso, 2018-08-27 Written for skeptics and believers alike A Climate of Desire is an unconventional blend of the provocative ecological wisdom of the biblical writers with contemporary insights from sustainability experts and practitioners As we enter an increasingly agitated virtual age and what many affirm is a new period of global warming the way ahead demands rethinking and collaboration It also calls us to reconsider our longings and desires Hence this book bringing popular culture faith and science into dialogue Filled with anecdotes surprising flashbacks of history and concrete and visionary possibilities for change these pages will both challenge and inspire you to follow a forgotten path that s filled with hope for the decades to come www.climateofdesire.com

Teaching Sustainability Wendy Petersen Boring, William Forbes, William Forbes (Professor of geography), 2013

American colleges and universities have been relatively quick to address the challenge of sustainability in operations Ironically they have been slower to respond in regard to their core mission educating students Teaching sustainability aims to redress this shortcoming by opening doors to education for sustainability in the humanities and social sciences The essays in this collection are richly diverse They investigate ways sustainability education pushes back against traditional disciplines while it simultaneously benefits from the perspectives and skills these fields have to offer They also address big questions such as how to make education meaningful how to examine hidden assumptions underlying current curricula and how a focus on sustainability can answer critics of contemporary higher education The heart of teaching sustainability is reflection and advice on pedagogy From these richly diverse case studies important common themes emerge the symbiotic relationship between classroom and campus operations techniques for transforming the campus itself from merely a setting to a learning laboratory and the potential of community partners for teaching sense of place An equally significant theme is the overlap between sustainability education and emerging best practice in pedagogy Essays on theory and practice individual and collaborative projects service learning and consequential activities all exemplify how sustainability and deep learning go hand and hand Like sustainability itself the volume infuses theory with practical application The contributors demonstrate the ways in which a single course can serve as a powerful change agent for an entire campus how to build bridges between faculty and administrators and even how to move forward on modest budgets The authors themselves constitute a network of advisors Publisher s description [Montana Law Review](#) ,2012 **The Publishers Weekly** ,2009 [The British National Bibliography](#) Arthur James Wells, 2009 **The Illustrated London News** ,1877 *English Mechanic and World of Science* ,1882 [Pitman's Business Man's Encyclopaedia and Dictionary of Commerce](#) Arthur Coles, 1927 *The Gardeners' Chronicle* ,1885 [English Mechanic and Mirror of Science](#) ,1882 [Harper's Bazaar](#) ,1870 **English Mechanic and Mirror of Science and Art** ,1882 **The Cultivator & Country Gentleman** ,1885 **Garden Life** ,1925
