Current Status and Trends in Urban Agriculture Thomas Henry Whitlow, Yoshiaki Harada, Zhongqi Cheng, Gaston Small, 2022-03-31 **From Farm to Fork**, 2016-07-01 Interest in the food we eat and how it is produced distributed and consumed has grown tremendously in the last few years Consumers are exchanging highly processed genetically engineered chemical laden and pesticide contaminated food often associated with big agribusinesses for fresh produce grown using organic methods The growth of farmers markets from 1 755 in 1994 to over 7 500 today in both urban and rural areas is just one indication that consumers are interested in knowing who produced their food and how the food was produced This book addresses the importance of creating food systems that are sustainable by bringing together a number of experts in the fields of law economics nutrition and social sciences as well as farmers and advocates These experts share their perspectives on some of the pressing issues related to sustainable food systems and offer solutions for achieving healthy sustainable and equitable food systems in the future *Just Food* James E. McWilliams, 2009-08-26 We suffer today from food anxiety bombarded as we are with confusing messages about how to eat an ethical diet Should we eat locally Is organic really better for the environment Can genetically modified foods be good for you Just Food does for fresh food what Fast Food Nation did for fast food challenging conventional views and cutting through layers of myth and misinformation For instance an imported tomato is more energy efficient than a local greenhouse grown tomato And farm raised freshwater fish may soon be the most sustainable source of protein Informative and surprising Just Food tells us how to decide what to eat and how our choices can help save the planet and feed the world **Backpacker**, 2007-09 Backpacker brings the outdoors straight to the reader s
