Joint Replacement Technology Peter A. Revell, 2014-06-13 This second edition of *Joint Replacement Technology* provides a thoroughly updated review of recent developments in joint replacement technology. Joint replacement is a standard treatment for joint degradation and has improved the quality of life of millions of patients. Collaboration between clinicians and researchers is critical to its continued success and to meet the rising expectations of patients and surgeons. Part one introduces the advances in joint replacement technology, tribological considerations and experiments and immune and regenerative responses to joint replacements. Part two covers the materials and techniques used in joint replacement. The advantages and disadvantages of different metals are explained here as well as the use of ceramics. This section also addresses challenges in joint bearing surfaces design and cementless fixation techniques. Biological and mechanical issues are considered in part three including healing responses to implants and biological causes of prosthetic joint failure and a new chapter on imaging of joint prostheses. Each chapter in part four describes the clinical challenges of replacing specific joints with specific focus on hip, knee, intervertebral disc, joint, shoulder arthroplasty, elbow arthroplasty and pyrocarbon small joint arthroplasty. Thanks to its widespread collaboration and international contributors, *Joint Replacement Technology* is useful for materials scientists and engineers in both academia and biomedical industry. Chemists, clinicians and other researchers in this area will also find it invaluable. This second edition provides an updated comprehensive review of recent developments in joint replacement technology. Provides coverage for the most pertinent materials science and engineering issues in depth. Reviews the specific joints, biological and mechanical issues and fixation techniques. **IGCSE Mathematics** Carin Abramovitz, 1998 *IGCSE Mathematics Module 3* University of Cambridge Local Examinations Syndicate, 1998-01-28.
