Milanova, Aboul-Ella Hassanien, 2009-01-29 The purpose of this book is to provide an overview of state of the art methodologies currently utilized for biomedicine and or bioinformatics oriented applications Researchers working in these fields will learn new methods to help tackle their problems Self-Adaptive Heuristics for Evolutionary Computation Oliver Kramer, 2008-08-19 Evolutionary algorithms are successful biologically inspired meta heuristics Their success depends on adequate parameter settings The question arises how can evolutionary algorithms learn parameters automatically during the optimization Evolution strategies gave an answer decades ago self adaptation Their self adaptive mutation control turned out to be exceptionally successful But nevertheless self adaptation has not achieved the attention it deserves This book introduces various types of self adaptive parameters for evolutionary computation Biased mutation for evolution strategies is useful for constrained search spaces Self adaptive inversion mutation accelerates the search on combinatorial TSP like problems After the analysis of self adaptive crossover operators the book concentrates on premature convergence of self adaptive mutation control at the constraint boundary Besides extensive experiments statistical tests and some theoretical investigations enrich the analysis of the proposed concepts *Software Engineering Research, Management and Applications* Roger Lee, 2009-01-29 The 6th ACIS International Conference on Software Engineering Research Management and Applications SERA 2008 was held in Prague in the Czech Republic on August 20 22 SERA 08 featured excellent theoretical and practical contributions in the areas of formal methods and tools requirements engineering software process models communication systems and networks software quality and evaluation software engineering networks and mobile computing parallel distributed computing software testing reuse and metrics database retrieval computer security software architectures and modeling Our conference officers selected the best 17 papers from those papers accepted for presentation at the conference in order to publish them in this volume The papers were chosen based on review scores submitted by members or the program committee and underwent further rounds of rigorous review **Rough - Granular Computing in Knowledge Discovery and Data Mining** J.  Research has shown that harassed decision makers in decision support technologies for real time and uncertain decision problems often ignore crucial information use inefficient strategies and generate fewer alternatives Examples of such problems are medical emergencies traffic flow and military applications Researchers are limited by a narrow understanding of the most effectual methods to support decision making in real time and stressful situations Intelligent software agents offer one approach to operationalizing a decision making support system in these circumstances by providing an environment that can adapt to speed and change Agent technology has been used to aid and automate complex problem solving such as brokering in electronic commerce and financial services An agent is a software package that carries out tasks for others autonomously whether the others are human users business processes workflows or applications **Hyper-architecture and the Hyper-real** Maurizio Forte,2006 *Proceedings of the ...
