**Handbook of Climate Change Impacts on River Basin Management** Saeid Eslamian, Mir Bintul Huda, Nasir Ahmad Rather, Faezeh A. Eslamian, 2024-08-29 Climate change not only involves rising temperatures but it can also alter the hydro meteorological parameters of a region and the corresponding changes emerging in the various biotic or abiotic environmental features One of the results of climate change has been the impact on the sediment yield and its transport These changes have implications for various other environmental components particularly soils water bodies water quality land productivity sedimentation processes glacier dynamics and risk management strategies to name a few This volume provides an examination of the technological approaches to water management and the practical applications for remote sensing satellite image processing and advanced statistical methods all which can be utilized to predict monitor and manage the effects of climate change on river basins

**Dynamic Response of Coasts and Estuaries to Human Impacts** Xiao Hua Wang, 2024-07-25 The coasts cover a diverse range of ecosystems within marine estuarine and freshwater environments They are some of the most heavily populated and visited areas and are also some of the most threatened natural habitats Coastal zones are critically important not only to the people who live there but for the health of the planet Many world estuaries and coast environments are under tremendous stress in response to global warming and the increased anthropogenic forcing Warmer waters rising sea levels tropical cyclones storm surges and flooding and coastal erosion are just some of the elements impacting coastal communities worldwide and transforming these environments Coastal hazards such as storm events with associated storm surges are increasing in frequency and intensity as are marine heatwaves that devastate coral reefs Human activities like sewage discharge overfishing navigation channel dredging land reclamation the construction of shipping ports and marine plastics are also responsible for coastal pollution and degradation Therefore a

good understanding of the current state of coastal environments and lessons learnt from these human influences is extremely valuable to restore and protect these habitats and ecosystems from further environmental degradation and even catastrophe. In this book case studies are used to tell a story about how these environments respond to severe human induced perturbations and what has gone right and wrong from environmental and resource management point of view. The readership of the book include high level undergraduate Oceanography students and workers from Coastal Engineering and Management.
