### **Eric Carle Tiny Seed Lesson Plan:**

*Developing Teaching Skills in the Primary School* Jane Johnston, John Halocha, Mark Chater, 2007-10-16 Teaching is a complex process which involves the development and utilization of subject knowledge and teaching skills. Containing reflective and practical skills, this book supports such development focusing specifically on teaching skills, considering what they are, how they develop, and how they differ between age and subject. The book contains three sections: Planning, Doing, and Reviewing, which demonstrate effective classroom practice. It uses examples of practitioners at different stages of their professional development to link theory and practice and includes discussions on contemporary issues in primary education such as Constructivist teaching and learning, Thinking skills, Creativity, Teaching and learning styles, Child-centred learning. The authors provide a critical analysis of the issues, practice, and problems faced by primary school teachers, which is supported by reflective tasks throughout the book. Emphasizing the child as a partner in the learning process and highlighting the importance of teaching for child-centred learning, the book ultimately develops and strengthens the teacher's skills. *Developing Teaching Skills in the Primary School* provides essential guidance and support to trainee, beginner, and developing primary school teachers.

**Teaching Science and Technology in the Early Years (3-7)** Dan Davies, Alan Howe, Christopher Collier, Rebecca Digby, Sarah Earle, Kendra McMahon, 2014-04-24 Teaching Science and Technology in the Early Years 3-7 celebrates young children's amazing capabilities as scientists, designers, and technologists. Research-based yet practical and accessible, it demonstrates how scientific designing and making activities are natural to young children and have the potential for contributing to all aspects of their learning. By identifying the scientific and design-related concepts, skills, and activities being developed, the book enables the reader to make more focused diagnostic observations of young children and plan for how they can help move them forward in their learning. This second edition has been thoroughly updated and features six new chapters providing practical advice and examples for enhancing scientific and technological learning through thematic approaches, a new chapter focusing on the outdoor learning environment and how this can support science and technology, new case studies of successful early years practice alongside examples of practical planning for learning, and advice on documenting children's learning stories. Guidance on the role of talk, narrative, documentation, and planning in relation to early years science and technology. Based on the latest research and the first-hand experience, this practical and accessible book is essential reading for early years and primary students on undergraduate and Masters level courses.
