

The book is devoted to the history of structural mechanics and structural theory presented in the form of essays on development of their trends, naturally, the list of these trends may be extended. Moreover, certain history of origin and formation of the corresponding concepts, principles, ideas and problems and ways of their solution is relevant in each trend. The presentation of content by sections is accompanied by facts from the life and activities of outstanding scientists as well as by cognitive illustrations. It is according to latter Clark Maxwell: "In Science, it is when we take some interest in the great discoverers and their lives that it becomes profitable, and only when we begin to trace the development of ideas that it becomes fascinating". The book may be used as a manual for students of higher educational institutions studying related programs, studying special course, etc. It is generally oriented to the students and readers, who have studied necessary courses of structural mechanics and related engineering disciplines as well as for lecturers and scientific and technical workers.
