

The background of the cover is a photograph of a rugged mountain range. In the foreground, there are steep, rocky slopes with patches of snow and small glaciers. In the background, several sharp, jagged mountain peaks rise against a clear blue sky with some light clouds. The overall scene is one of a high-altitude, alpine environment.

Fundamentals of Geomorphology

Reader in Geography Richard Huggett, 2007-07 This extensively revised and updated edition continues to present an engaging and comprehensive introduction to the subject exploring the world's landforms from a broad systems perspective. It reflects on the latest developments in the field and includes new chapters on geomorphic materials and processes, hillslopes and changing landscapes. Fundamentals of Geomorphology is an engaging and comprehensive introduction. Starting with a consideration of the nature of geomorphology and the geomorphic system, geomorphic materials and processes and the quest of process and historical geomorphologists, it moves on to discuss structure landforms resulting from or influenced by the endogenic agencies of tectonic and volcanic processes, geological structures and rock types, process and form landforms resulting from or influenced by the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind and the sea, history of earth surface, history giving a discussion of Quaternary landforms and ancient landforms including the origin of old plains, relict, exhumed and stagnant landscape features and evolutionary aspects of landscape change. Fundamentals of Geomorphology provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, including a colour plate section.

Fundamentals of Geomorphology Richard Huggett, 2016-11-21 The new fourth edition of Fundamentals of Geomorphology continues to provide a comprehensive introduction to the subject by discussing the latest developments in the field as well as covering the basics of Earth surface forms and processes. The revised edition has an improved logically cohesive structure, added recent material on Quaternary environments and landscapes, landscape evolution and tectonics as well as updated information in fast-changing areas such as the application of dating techniques, digital terrain modelling, historical contingency, preglacial landforms, neocatastrophism and biogeomorphology. The book begins with a consideration of the nature of geomorphology, process and form, history and geomorphic systems and moves on to discuss Endogenic processes, structural landforms associated with plate tectonics and those associated with volcanoes, impact craters and folds, faults and joints. Exogenic processes, landforms resulting from or influenced by the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind and the sea, landforms developed on limestone and long-term geomorphology, a discussion of ancient landforms including palaeosurfaces, stagnant landscape features and evolutionary aspects of landscape change.
