Future Babble Why Pundits Are Hedgehogs And Foxes Know Best:

Future Babble Daniel Gardner, 2011-03-17 An award winning journalist uses landmark research to debunk the whole expert prediction industry and explores the psychology of our obsession with future history In 2008 experts predicted gas would hit 20 a gallon it peaked at 4 10 In 1967 they said the USSR would be the world s fastest growing economy by 2000 by 2000 the USSR no longer existed In 1908 it was pronounced that there would be no more wars in Europe we all know how that turned out Face it experts are about as accurate as dart throwing monkeys And yet every day we ask them to predict the future everything from the weather to the likelihood of a terrorist attack *Future Babble* is the first book to examine this phenomenon showing why our brains yearn for certainty about the future why we are attracted to those who predict it confidently and why it s so easy for us to ignore the trail of outrageously wrong forecasts In this fast paced example packed sometimes darkly hilarious book journalist Dan Gardner shows how seminal research by UC Berkeley professor Philip Tetlock proved that the more famous a pundit is the more likely he is to be right about as often as a stopped watch Gardner also draws on current research in cognitive psychology political science and behavioral economics to discover something quite reassuring The future is always uncertain but the end is not always near , [Navigating the Polycrisis](#) Michael J. Albert, 2024-04-23 An innovative work of realism and utopianism that analyzes the possible futures of the world system and helps us imagine how we might transition beyond capitalism The world system of which we are all a part faces multiple calamities climate change and mass extinction the economic and existential threat of AI the chilling rise of far right populism and the invasion of Ukraine to name only a few In *Navigating the Polycrisis* Michael Albert seeks to illuminate how the planetary polycrisis will disrupt the global community in the coming decades and how we can best meet these challenges Albert argues that we must devote more attention to the study of possible futures and adopt transdisciplinary approaches to do so To provide a new form of critical futures analysis he offers a theoretical framework planetary systems thinking that is informed by complexity theory world systems theory and ecological Marxism *Navigating the Polycrisis* builds on existing work on climate futures and the futures of capitalism and makes three main contributions First the book brings together modeling projections with critical social theory in a more systematic way than has been done so far Second the book shows that in order to grasp the complexity of the planetary polycrisis we must analyze the convergence of crises encompassing the climate emergency the structural crisis of global capitalism net energy decline food system disruption pandemic risk far right populism and emerging technological risks e g in the domains of artificial intelligence biotechnology and nuclear weapons And third the book contributes to existing work on postcapitalist futures by analyzing the processes and mechanisms through which egalitarian transitions beyond capitalism might occur A much needed work of global futures studies *Navigating the Polycrisis* brings together the rigor of the natural and social sciences and speculative imagination informed by science fiction to forge pathways to our possible global future **Not knowing (no saber)** Steven D'Souza, Diana Renner, 2014 Con el fin

Superforecasting Philip E. Tetlock,Dan Gardner,2015-09-29 From one of the world s most highly regarded social

scientists comes a seminal book on forecasting that shows for the first time how we can all get better at making predictions. In *Superforecasting*, Tetlock and coauthor Dan Gardner offer a masterwork on prediction drawing on decades of research and the results of a massive government funded forecasting tournament. The Good Judgment Project involves tens of thousands of ordinary people including a Brooklyn filmmaker, a retired pipe installer, and a former ballroom dancer who set out to forecast global events. Some of the volunteers have turned out to be astonishingly good. They've beaten other benchmarks, competitors, and prediction markets. They've even beaten the collective judgment of intelligence analysts with access to classified information. They are superforecasters. The authors show us how we can learn from this elite group. Weaving together stories of forecasting successes, the raid on Osama bin Laden's compound and failures, the Bay of Pigs, and interviews with a range of high level decision makers from David Petraeus to Robert Rubin, they show that good forecasting doesn't require powerful computers or arcane methods. It involves gathering evidence from a variety of sources, learning to think probabilistically, working in teams, keeping score, and being willing to admit error and change course. *Superforecasting* offers the first demonstrably effective way to improve our ability to predict the future, whether in business, finance, politics, international affairs, or daily life, and is destined to become a modern classic.

Future Babble Dan Gardner, 2012. Face it, experts are about as accurate as dart-throwing monkeys. And yet every day we ask them to predict the future, everything from the weather to the likelihood of a terrorist attack. *Future Babble* is the first book to examine this phenomenon, showing why our brains yearn for certainty about the future.

Expert Political Judgment Philip E. Tetlock, 2017-08-29. Since its original publication, *Expert Political Judgment* by New York Times bestselling author Philip Tetlock has established itself as a contemporary classic in the literature on evaluating expert opinion. Tetlock first discusses arguments about whether the world is too complex for people to find the tools to understand political phenomena, let alone predict the future. He evaluates predictions from experts in different fields, comparing them to predictions by well-informed laity or those based on simple extrapolation from current trends. He goes on to analyze which styles of thinking are more successful in forecasting. Classifying thinking styles using Isaiah Berlin's prototypes of the fox and the hedgehog, Tetlock contends that the fox, the thinker who knows many little things, draws from an eclectic array of traditions and is better able to improvise in response to changing events, is more successful in predicting the future than the hedgehog, who knows one big thing, toils devotedly within one tradition, and imposes formulaic solutions on ill-defined problems. He notes a perversely inverse relationship between the best scientific indicators of good judgment and the qualities that the media most prizes in pundits: the single-minded determination required to prevail in ideological combat. Clearly written and impeccably researched, the book fills a huge void in the literature on evaluating expert opinion. It will appeal across many academic disciplines as well as to corporations seeking to develop standards for judging expert decision making. Now with a new preface in which Tetlock discusses the latest research in the field, the book explores what constitutes good judgment in predicting future events and

looks at why experts are often wrong in their forecasts *Superprognose* Philip Tetlock, Dan Gardner, 2016-06-24
