*Navigating The Digital Shift: Implementation Strategies for Blended and Online Learning* John Bailey, Carri Schneider, Tom Vander Ark, 2013-10-09 Our nation's schools stand at an important inflection point in the history of education Taken together the implementation of common college and career standards the shift to next generation assessments the availability of affordable devices and the growing number of high quality digital instructional tools create an unprecedented opportunity to fundamentally shift the education system to personalize learning around the individual needs of every student Digital Learning Now DLN a national initiative under the Foundation for Excellence in Education ExcelinEd in association with *Getting Smart* brings *Navigating the Digital Shift Implementation Strategies for Blended and Online Learning* to readers interested in exploring the implementation challenges at the intersection of these shifts Co authored by John Bailey Carri Schneider and Tom Vander Ark *Navigating the Digital Shift* offers updated versions of the eight papers originally released in the DLN Smart Series including contributions from 11 additional co authors representing leading organizations such as Public Impact the International Association for K 12 Online Learning iNACOL and The Learning Accelerator Topics include blended learning implementation teaching conditions and careers competency based learning student data online learning myths and student based funding Jeb Bush Governor of Florida from 1999 2007 and Chairman of ExcelinEd contends that the book provides policymakers and education leaders the tools they need to use digital learning as a catalyst for improved student achievement AASA 2013 Superintendent of the Year Dr Mark Edwards believes the collection provides meaningful practical and poignant advice as well as commentary regarding the move to college and career ready standards associated with the

shift to personal online learning and digital resources Rhode Island's Commissioner of Elementary and Secondary Education Deborah Gist describes the book as an invaluable resource that will help educators re-imagine what our schools can look like and what our students can accomplish      Learning from the Federal Market-Based Reforms William J. Mathis, Tina M. Trujillo, 2016-06-01 Over the past twenty years educational policy has been characterized by top-down market-focused policies combined with a push toward privatization and school choice The new Every Student Succeeds Act continues along this path though with decision-making authority now shifted toward the states These market-based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low-scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation's most prominent researchers the book explores the major elements of these reforms as well as the social, political, and educational contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or massive personnel changes and school closures From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re-segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single-handedly overcome societal inequalities important work can take place within the public school system with evidence-based interventions such as early childhood education detracking adequate funding and full-service community schools all intended to renew our nation's commitment to democracy and equal educational opportunity      *The NEW School Rules* Anthony Kim, Alexis Gonzales-Black, 2018-01-06 Actions to increase effectiveness of schools in a rapidly changing world To stay relevant and impactful organizations from the military to government agencies to businesses must constantly evolve Organizations that cling to rigid structures designed for less dynamic times are stuck in routines that don't get results Instead of withstanding a structure built for the industrial age how can we empower our schools to be nimble and equipped to prepare their students for this new world The NEW School Rules expands cutting-edge organizational and management strategies into an operating system for responsive schools These principles and practices provide the framework for transitioning rigid slow-moving institutions into environments of continuous innovation 6 simple rules create a unified vision of responsiveness among educators Real-life case studies illustrate responsive techniques implemented in a variety of educational demographics 15 experiments guide school and district leaders toward increased responsiveness in their faculty
