Dynamical Systems Nam Parshad Bhatia,1967 The General Topology of Dynamical Systems Ethan Akin,1993

Recent work in dynamical systems theory has both highlighted certain topics in the pre existing subject of topological dynamics such as the construction of Lyapunov functions and various notions of stability and also generated new concepts and results This book collects these results both old and new and organises them into a natural foundation for all aspects of dynamical systems theory Seminar on Differential Equations and Dynamical Systems James A. Yorke,2006-11-15

Differential and integral inequalities; theory and applications PART B: Functional, partial, abstract, and complex differential equations Lakshmikantham,1969 *Differential and integral inequalities theory and applications PART B Functional partial abstract and complex differential equations* Nonautonomous Dynamical Systems in the Life Sciences Peter E.

Kloeden,Christian Pötzsche,2014-01-22 *Nonautonomous dynamics* describes the qualitative behavior of evolutionary differential and difference equations whose right hand side is explicitly time dependent Over recent years the theory of such systems has developed into a highly active field related to yet recognizably distinct from that of classical autonomous dynamical systems This development was motivated by problems of applied mathematics in particular in the life sciences where genuinely nonautonomous systems abound The purpose of this monograph is to indicate through selected representative examples how often nonautonomous systems occur in the life sciences and to outline the new concepts and tools from the theory of nonautonomous dynamical systems that are now available for their investigation Dynamical Systems: Stability Theory and Applications Nam P.
