Energy Security And Climate Change Triangle Papers:

China, Oil and Global Politics Philip Andrews-Speed, Roland Dannreuther, 2011-05-12 This book provides a critical overview of how China's growing need for oil imports is shaping its international economic and diplomatic strategy and how this affects global political relations and behaviour. It draws together the various dimensions of China's international energy strategy and provides insights into the impact of this on China's growing presence across the world.

Earth at Risk in the 21st Century: Rethinking Peace, Environment, Gender, and Human, Water, Health, Food, Energy Security, and Migration Úrsula Oswald Spring, 2020-04-03 Earth at Risk in the 21st Century offers critical interdisciplinary reflections on peace, security, gender relations, migration, and the environment, all of which are threatened by climate change, with women and children affected most. Deep-rooted gender discrimination is also a result of the destructive exploitation of natural resources and the pollution of soils, water, biota, and air. In the Anthropocene, the management of human society and global resources has become unsustainable and has created multiple conflicts by increasing survival threats, primarily for poor people in the Global South. Alternative approaches to peace and security, focusing from bottom-up on an engendered peace with sustainability, may help society and the environment to be managed in the highly fragile natural conditions of a hothouse Earth. Thus, the book explores systemic alternatives based on indigenous wisdom, gift economy, and the economy of solidarity, in which an alternative cosmovision fosters mutual care between humankind and nature. Special analysis of risks to the survival of humankind in the 21st century. Interdisciplinary studies on peace, security, gender, and environment related to global environmental and climate change. Critical reflections on gender relations, peace, security, migration, and the environment. Systematic analysis of food, water, health, energy security, and its nexus. Alternative proposals from the Global South with indigenous wisdom for saving Mother Earth.

Energy Security Challenges for the 21st Century Gal Luft, Anne Korin, 2009-08-10 The impact of energy on global security and economy is clear and profound, and this is why in recent years energy security has become a source of concern to most countries. However, energy security means different things to different countries based on their geographic location, their endowment of resources, their strategic and economic conditions. In this book, Gal Luft and Anne Korin, with the help of twenty leading experts, provide an overview of the world's energy system and its vulnerabilities that underlay growing concern over energy security. It hosts a debate about the feasibility of resource conflicts and covers issues such as the threat of terrorism to the global energy system, maritime security, the role of multinationals and non-state actors in energy security, the pathways to energy security through diversification of sources and the development of alternative energy sources. It delves into the various approaches, selected producers, consumers, and transit states have toward energy security, and examines the domestic and foreign policy tradeoffs required to ensure safe and affordable energy supply. The book explains the various pathways to energy security and the tradeoffs among them and demonstrates how all these factors can be integrated in a larger foreign

and domestic policy framework It also explores the future of nuclear power the complex relations between energy security and environmental concerns and the role for decentralized energy as a way to enhance energy security *Global Warming and Climate Change* A. Marquina,2010-02-24 This compendium looks at Asian and European policies for dealing with climate change and possible impacts on conflicts and security It clarifies the impacts of climate change on natural resources on the frequency and expansion of natural disasters and the repercussions for environmentally induced migration **Triangle Papers** ,1996 **Energy Security and Climate Change** John M. Deutch,Anne Lauvergeon,Widhyawan Prawiraatmadja,2007 In this book authors from North America Europe and Pacific Asia enter the controversial debate of how to meet growing energy demands while minimizing the subsequent impact on global warming John Deutch offers a tour d horizon of global energy issues and climate change that also provides analysis of U S domestic energy politics Anne Lauvergeon summarizes the European viewpoint on these issues and makes a detailed and forceful case for large scale concentration on nuclear power development within an enhanced nonproliferation framework Widhyawan Prawiraatmadja proposes mechanisms for increasing regional energy security that take into consideration Pacific Asia s broad geography fast paced development and infrastructure requirements *Energy Security and Climate Change* is both a careful analysis of global remedies and an appreciation of regional approaches that can be devised to meet common challenges Although the United States Europe and Pacific Asia have differing energy needs this book reveals that they show surprising congruence in their proposed solutions **Energy Security and Climate Change in the Trilateral Context** John M. Deutch,Edmond Alphandéry,2015 This report revisits a topic explored in a 2007 Commission report that included a series of widely accepted energy predictions many of which have proven significantly mistaken by 2015 The report assesses the complex and changing relationship between energy supply the global economy and geopolitics in a world in which North America has seen a revolutionary change in its production of both oil and natural gas where it is now a net exporter It is also a world where Europe continues to strive to diversify supply and maximize flexibility in the face of a security challenge in Ukraine It is a world where the Asia Pacific region aims to diversify supply increase conservation and reassess nuclear power in the wake of Fukushima Across this backdrop efforts to reduce the negative impact of fossil fuel use on climate are examined and progress graded *Food Security and Climate Change in the Pacific* ,2011 The Pacific developing member countries DMCs of the Asian Development Bank ADB are a diverse array of countries with widely varying topographies cultures and economies fragile natural resource environments and prosperity stability and security that can be compromised by the impacts and consequences of climate change The Pacific island governments view climate change as a priority issue especially in terms of its potential impacts on food security and need clear directions in addressing both issues This report describes the present state of food security and its contributing factors in the Pacific region assesses its prospects amid the growing threats and likely impacts of climate change and presents potential areas for more active assistance investments and interventions from

ADB and other development partners While technical and policy measures to ensure food security amid the ensuing climate change are numerous interrelated and complex the successful implementation of programs and projects calls for simple and flexible designs that carefully consider the capabilities of relevant stakeholders at the regional national and local levels
