## ATOMS AND ELECTRONS

**Abstract:** The authors of this paper propose a new scientific theory of social system evolution (social theory) by developing strategic method models instead of the existing classic theories of evolution (evolutionary developmentalism). The key of this theory is the scientific theory of social system evolution (social theory) for modeling the evolution of social systems in terms of quantum mechanical transformations. Such a theory is proposed for modeling the evolution of social systems, social changes, and human action. The key of this theory is the scientific theory of social systems and their changes in the quantum field theory framework of social systems. The key of this theory is the scientific theory of social systems and their changes in the quantum field theory framework of social systems.
