

## ENGINE ROOM RATING NIMI 07107

### Who is engine rating?

Ratings are skilled seafarers who assist officers on the deck, in the engine room and in the catering departments who carry out essential tasks in day to day running of the ship. The duties of rating depend on the type of ship and the department.

### What is the importance of engine parameters?

#### Engine Parameters:

The engine parameters are the best source for finding out any fault or variation in the engine performance. Variation in temperature, pressure and power produced by each cylinder must be frequently monitored and adjustment must be done accordingly to achieve efficient combustion.

### Following entries must be filled in the engine room logbook:

- Date and voyage where the ship is heading.
- The position of the ship (at sea, at port or at anchorage)
- Readings and Parameters of Main Propulsion Engine.
- Readings and Parameters of Auxiliary Engine (Generators)
- Readings and Parameters of Other running Machinery.

### Engine Control Room

Most of the readings and entries shown above can also be taken from the ship's control room, although it is advisable to take local readings. Yet these readings can be compared to those of the remote indications. This will also give an idea about the variation in the two so that in case of any large deviations, necessary checks can be performed. Also in case of rush hours such as maneuvering, the engineers would know the actual readings if they are familiar with the deviations in control room and actual readings.
