Discourse A Critical Introduction by JAN BLOMMAERT

Contents

What are we talking about?

The critical pool

Five principles

What are we talking about?

- Power is not a bad thing -- those who are in power will confirm it. They will argue convincingly that power is necessary in every system, for it is often that which allows the system to function in particular ways, without which the system would disintegrate or cease to operate effectively.
- Power is a concern to many people, something that is easily translated into topics of discussion or narration. Power, its actors, its victims, and its mechanisms are often the talk of the town, and our everyday conversations, our mass media, our creative arts gladly use power as themes or motifs in discourses on society at large.
- Few individuals are more fascinating than those who embody and emanate absolute power and are not afraid of wielding it in unscrupulous ways -- Stalin, Napoleon, Mobutu, W. R. Hearst, and Onassis were all culture heroes of some sort in their days and afterwards.
- Scores of scholars ranging from Plato over Hobbes, Machiavelli, Marx, Gramsci to Foucault and Althusser have all theorized on the nature of power.
- We seem to have a strangely ambivalent attitude towards power: it attracts as well as repels; it fascinates and abhors at the same time; it has a beauty as well as an ugliness to it that match those of few other phenomena.

- Critical discourse analysis is an analysis of power effects, of the outcome of power, of what power does to people, groups, and societies

Discourse Critical Introduction Jan Blommaert:

Discourse Jan Blommaert, 2005 **Discourses on Language and Integration** Gabrielle Hogan-Brun, Clare Mar-Molinero, Patrick Stevenson, 2009 One of the most pressing issues in contemporary European societies is the need to promote integration and social inclusion in the context of rapidly increasing migration A particular challenge confronting national governments is how to accommodate speakers of an ever increasing number of languages within what in most cases are still perceived as monolingual indigenous populations This has given rise to public debates in many countries on controversial policies imposing a requirement of competence in a national language and culture as a condition for acquiring citizenship However these debates are frequently conducted almost entirely at a national level within each state with little if any attention paid to the broader European context At the same time further EU enlargement and the ongoing rise in the rate of migration into and across Europe suggest that the salience of these issues is likely to continue to grow This volume offers a critical analysis of these debates and emerging discourses on integration and challenges the assumptions underlying the new language testing regimes **Discourses in Action** Klaus Krippendorff, Nour Halabi, 2020-01-20 This interdisciplinary collection brings together leading and emerging scholars of discourse conceptualizing how discursive practices shape social political and even material realities today Discourses in Action presents a wide range of essays that explore fundamental concerns for the social consequences of text talk and discursively informed actions and possibilities of discursive engagement It opens new perspectives on what language does and the differences that scholarly and practical contributions can make Chapters cover diverse topics ranging from political struggles climate change social revolutions ethnicity violence and other often unexpected patterns of discursive consequences Its essays also explore the cultural contingencies that underlie discourse practices which are usually ignored when analysed from within a taken for granted culture Providing a useful examination of current discourse studies this interdisciplinary volume is ideal for students and researchers within media communication discourse analysis linguistics cultural studies and the sociology of knowledge [The Cambridge Handbook of Sociolinguistics](#) Rajend Mesthrie, 2011-10-06 The most comprehensive overview available this Handbook is an essential guide to sociolinguistics today Reflecting the breadth of research in the field it surveys a range of topics and approaches in the study of language variation and use in society As well as linguistic perspectives the handbook includes insights from anthropology social psychology the study of discourse and power conversation analysis theories of style and styling language contact and applied sociolinguistics Language practices seem to have reached new levels since the communications revolution of the late twentieth century At the same time face to face communication is still the main force of language identity even if social and peer networks of the traditional face to face nature are facing stiff competition of the Facebook to Facebook sort The most authoritative guide to the state of the field this handbook shows that sociolinguistics provides us with the best tools for understanding our unfolding evolution as social beings **The Strategic Repositioning of Arts,**

Culture and Heritage in the 21st Century George Mugovhani, Owen Seda, 2018-06-11 The post millennium world has been experiencing several recognisable historical milestones with regard to arts culture and heritage One of these has been the resuscitation and revival of creative elements of the arts culture and heritage of previously marginalised or disadvantaged communities around the world Until recently there had been scant regard and skewed allocation of resources for these but lately attempts have been made to promote and sustain them in order to enable the socio economic aspirations of a multicultural society The contributions brought together here are the product of papers that were presented during a conference on Strategic Repositioning of Arts Culture and Heritage in the 21st Century They cover a broad spectrum of subjects such as indigeneity music song and identity politics national reconciliation education product development and national development
