Discovering Relativity For Yourself:

Discovering Relativity for Yourself Lilley, 1981-03-31 Discovering Relativity for yourself explains Einstein's Theory of Relativity to readers who are daunted by the standard mathematical approach to that profound theory For twenty years Sam Lilley taught this subject to adults with no science background Now he has written an explanation of the theory that demands no prior knowledge of mathematics or physics beyond an ability to do simple arithmetic The first quarter of the book uses no more than arithmetic and a little simple geometry to introduce some of the main concepts of the theory as well as discussing an impressive experimental test which comes down strongly in its favour When eventually further progress demands use of algebra and other mathematical techniques these are carefully explained in a way that makes them accessible to absolute beginners using many new and unorthodox methods

Discovering relativity for yourself Sam Lilley, 1978 **The Blue Streak** Alexander Rein, 2007-01-29 The hacker's approach to Special Relativity grew out of an attempt to demystify the puzzling features of the theory to intelligent but intuition blocked lay persons by a strategy aimed at this particular handicap The insufficiently understood basic concepts the most obstinate stumbling blocks are explained at length first The four dimensional cornerstone of the theory the all important Invariant is presented as a geometric structure analogous to the Diagonal of a box like Frame of Reference to which Time is subsequently added as the Fourth Dimension The exposition of the theory of Special Relativity is primarily intuition oriented while remaining also geometrically conceptualized and mathematically developed It is built up from scratch around First Principles starting out with our primitive notions of Space Time and Motion which are then continually updated and refined The conceptual tools and terminology for investigating Linear Motion at Uniform Velocity are provided in a step by step fashion and always visualized by suitable illustrations The Spacetime terrain curved but not spherical and its domains Past Present and Future are defined mapped and explained The standard topics of Special Relativity are individually elaborated in the already introduced step by step fashion and its mathematical results the equations are not just displayed in print as usually done in undergraduate textbooks but are actually derived from familiar situations using only elementary algebra the simplest possible math for the task These derivations are additionally written out fully in longhand for the benefit of those still inexperienced or whose math has all gone to rust The Theory of Relativity is covered in sufficient detail to make this book an optional supplement in a college level physics course It can also serve as a source of information and insight in high school and adult science clubs but above all it was meant to be a self study manual a virtual class room at home a do it yourself tutoring aid Besides standard fare two speculative topics are included 1 a Faster than Light chapter dealing with its chief reputed consequence the reversal of Time Arrow once the travel speed has crashed the Light Barrier and 2 a tentative description of a very very fast moving object caught by our wide open eyes or by a super fast shutter speed camera The book and its intended readership are described in the Preface Basic concepts and a brief historical background of the theory are given in the Introduction In Chapters I XV you

ll find the main topics and in the Postscript there are additional comments pertinent to but reaching above and beyond the contents of this book *The Human Reality* Valentin Matcas,2016-04-20 There is a difference between the material objective world and the actual human reality since the human reality is very vast formed of this physical objective world and much more Since there is a difference between the actual human reality and the current knowledge about the human reality while by altering the knowledge itself about the human reality it remains separated into the consensual human reality and the actual normal objective human reality While if you lack awareness of all these you end up exploited as a human being in a human world Because you cannot study the human reality without comprehending those controlling the knowledge about the human reality and how they do so forcefully consensually or through stereotypes set in place since Aristotle and long before since this is how they end up controlling you and the entire world Furthermore you cannot form an accurate model of the universe if you do not understand yourself if you do not understand exactly your needs driving you to perform this study if you do not understand your mind constituting your means of understanding the universe and if you do not understand Life altogether spanning the universe actively involved in its structure shape behavior and development At the same time understanding the world around is the key to understanding yourself your life and your meaning in life and in the world closing this circle of knowledge Since this is why we consider the most relevant circumstances behind the famous studies of the world we find true ideas and how they influence the understanding of the world throughout time we seek to understand how and why people accept consensual scientific and ideological models of this world and how this influences their life interconnectivity and development while we discover systematically this entire world Furthermore we use this study of the human reality to test all significant knowledge and ideas including human reasoning past civilizations indoctrination Einstein astral planes of existence ideologies Renaissance the Brotherhood ideological control ages of Earth cosmogony social and mind control Giordano Bruno consensual interconnectivity Relativity human origins and development Copernicus the Consensual Matrix the Big Bang Theory dreams ancient wars stereotypes Galileo Galilei conscious reasoning Schrodinger his cat Creationism alternate realities and much more the entire human reality This book studies systematically the human reality focusing on accurate truth while discarding beliefs and errors of reasoning correlating with all relevant knowledge form physics religion spirituality society education history psychology and more If you want to learn more about everything surrounding you and everything that you really are this book is for you *Discover Yourself* Paul Brunton,1946

Einstein's Special Relativity Ernie McFarland,1998 Einstein s Relativity Discover It Yourself is published by Fitzhenry and Whiteside *Science Digest* ,1982 **New Scientist and Science Journal** ,1981 **The Human Mind** Valentin Matcas,2014-10-16 It is nice to learn how mysterious and complex the human mind is who discovered the synapse when in what specific university and what everyone was doing that day but what you really want to know is how your mind functions how you reason how you have your feelings and ideas and how your mind affects you in every detail You want to know exactly

what happens in your mind when you watch the painting of Renoir with the beautiful woman wearing the white dress and playing the grand piano and why it makes you enjoy a beautiful moment then compared to watching sofas and armchairs You want to know all details related to how a simple yellow car on the road can remind you of your best friend and of all the loving moments that you once had through what cognitive mechanisms it happens and even more you want to know why it reminds you of your friend sometimes while other times it associates with work rain and shopping How exactly does the mind know all these Since it is interesting as it happens while it remains at an unconscious level and you just cannot find out how it takes place in order to be able to control it and use it whenever you desire You want to know exactly how you are able to predict the displacement of a tennis ball in order to hit it perfectly in an instant giving its exact speed direction and angular momentum necessary to win and doing so long before your conscious mind even perceives the ball How can your subconscious do so without your conscious mind while the conscious mind should be more capable and therefore better prepared according to science What is the exact cognitive mechanism Because if you can only know it all your strategies in life can become flawless You want to know exactly how your mind is able to solve advanced mathematical problems and how it retrieves on its own the proper knowledge in order to perform very abstract operations How does everything happen How do you have your ideas in mathematics business and art What is the human creativity and how can the human mind achieve it at will and in all domains What exactly makes your brain perform better or worse under all circumstances and why exactly is reasoning different in everybody How do you perform abstract thinking How do you imagine How exactly does your mind generate plans and strategies related to important future events How do you comprehend and enjoy various topics in psychology literature mathematics art and music How do you love How does everything happen within your mind brain and the entire organism Because this is of interest this is what you want to know while this is what you actually need in life since without these you cannot understand your mind the extraordinary human mind And since your mind and reasoning integrate you in life and in the world now you cannot understand yourself life the world and your place and meaning in life and in the world without understanding the human mind along with the human reasoning While it is meaningful to know these well otherwise you end up doing everything else instead of reasoning accurately developing entirely and behaving adequately in life and in the world Since ignorance always harms the world while now it even has its own cause the lack of accurate knowledge about the human mind Throughout this book we create a comprehensive mental model for the human mind including its structure abilities development interconnectivity reasoning and further meanings allowing you to understand yourself and your entire cognition If you want to understand the human mind in all its meaningful details this book is for you
