## **Forging Chinas Military Might A New Framework For Assessing Innovation:**

Forging China's Military Might Tai Ming Cheung, 2014-02-24 His collection of nine essays offers a comprehensive and insightful assessment of the Chinese defense science and technology S civil military integration China s defense innovation system and China s place in the global defense economy Case studies look in detail at the Chinese space and missile industry Constitutes high quality cutting edge research on China s defense industries It should enjoy broad appeal among academics policy makers security analysts and business people in countries around the world Andrew Scobell RAND Corporation Forging China s Military Might belongs in any political science shelf interested in China s issues and international security and considers the nature of China s emergence as a world power Midwest Book Review **China's Quest for Foreign Technology** William C. Hannas, Didi Kirsten Tatlow, 2020-09-22 This book analyzes China s foreign technology acquisition activity and how this has helped its rapid rise to superpower status Since 1949 China has operated a vast and unique system of foreign technology spotting and transfer aimed at accelerating civilian and military development reducing the cost of basic research and shoring up its power domestically and abroad without running the political risks borne by liberal societies as a basis for their creative developments While discounted in some circles as derivative and consigned to perpetual catch up mode China s hybrid system of legal illegal and extralegal import of foreign technology combined with its indigenous efforts is the authors believe enormously effective and must be taken seriously Accordingly in this volume 17 international specialists combine their scholarship to portray the system s structure and functioning in heretofore unseen detail using primary Chinese sources to demonstrate the perniciousness of the problem in a manner not likely to be controverted The book concludes with a series of recommendations culled from the authors interactions with experts worldwide This book will be of much interest to students of Chinese politics US foreign policy intelligence studies science and technology studies and International Relations in general Report to Congress of the U.S.-China Economic and Security Review Commission U.S.-China Economic and Security Review Commission, 2015 *Reshaping the Chinese Military* Richard A. Bitzinger, James Char, 2018-11-09 This edited volume examines the recalibration of the People s Liberation Army s PLA roles and missions in China s domestic and foreign policymaking since Xi Jinping s ascension to power in late 2012 This book explores how China s growing military prowess along with Beijing s ongoing shift away from keeping a low profile owes much to the policies of the China s Communist Party under Xi Jinping s leadership The chapters in the book share a central theme the recalibration of the PLA roles and missions since Xi Jinping assumed the trifecta of party state military power These contributions seek to explore in depth some of the key issues and scrutinize the enhancements in the PLA s operational capabilities both in terms of its hardware as well as its heartware the human elements of its development such as operational culture and doctrine In all the chapters document the transformative change the PLA has undergone since the profound realization of its previous limitations vis vis the United States advanced military operations of the previous century as well as pointing to continuity

amid change This book will be of much interest to students of strategic studies Chinese politics Asian security defense studies and international relations in general      **Research Handbook on the Arms Trade** Andrew T.H. Tan,2020-12-25 This comprehensive Research Handbook examines the key drivers of the arms trade mapping the main trends in Asia Europe the Middle East Africa and Latin America It also explores the principal defence markets internationally including the US China India Russia and the UK in greater detail      Handbook of US-China Relations Andrew T.H. Tan,2016-08-26 This Handbook addresses the key questions surrounding US China relations what are the historical and contemporary contexts that underpin this complex relationship How has the strategic rivalry between the two evolved What are the key flashpoints in their relationship What are the key security issues between the two powers The international contributors explore the historical political economic military and international and regional spheres of the US China relationship The topics they discuss include human rights Chinese public perception of the United States US China strategic rivalry China's defence build up and cyber war      The Publishers Weekly ,1998      **Defense and Disarmament Alternatives** ,1989      **Government Reports Annual Index** ,1993      Pollution Abstracts ,1995 Indexes material from conference proceedings and hard to find documents in addition to journal articles Over 1 000 journals are indexed and literature published from 1981 to the present is covered Topics in pollution and its management are extensively covered from the standpoints of atmosphere emissions mathematical models effects on people and animals and environmental action Major areas of coverage include air pollution marine pollution freshwater pollution sewage and wastewater treatment waste management land pollution toxicology and health noise and radiation      China's Military Power Roger Cliff,2015-09-15 Once termed the world's largest military museum the Chinese military has made enormous progress over the past twenty years With skyrocketing military budgets and new technology China's tanks aircraft destroyers and missile capabilities are becoming comparable to those of the United States If these trends continue how powerful will the Chinese military be in the future Will its capabilities soon rival or surpass those of the United States The most comprehensive study of its kind this book provides a detailed assessment of China's military capabilities in 2000 and 2010 with projections for 2020 It is the first of its kind in outlining a rigorous theoretically and empirically grounded framework for assessing military capability based on not just weaponry but also doctrine training equipment and organizational structure This framework provides not only the most accurate assessment of China's military to date but an important new tool in the study of military history      *China's Emergence as a Defense Technological Power* Tai Ming Cheung,2013-10-31 China is flexing its growing military and strategic clout in the pursuit of broadening national security interests At the same time the country's economic and technology policies have also become more nationalistic state centered and ambitious China's defense economy has set its sights on catching up with the West by the beginning of the 2020s and is making steady progress in building up its innovation capabilities although this is presently in the form of incremental and sustaining types of activities More high end disruptive forms of innovation that would lead to

major breakthroughs are likely to be beyond China's reach in the near to medium term. This volume provides a wide ranging and detailed assessment of the present state of the Chinese defense economy at a time of rapid change and accelerating advancement in its innovation capabilities and performance. This collection of articles has three main goals: 1) to locate China's defense innovation dynamics within broader historical, technological, and methodological frameworks of analysis; 2) to assess the performance of the Chinese defense economy's six principal subsectors; and 3) to compare China's approach to defense industrialization with major counterparts in the Asia Pacific region. This book was originally published as a special issue of the *Journal of Strategic Studies*.

**Fortifying China** Tai Ming Cheung, 2009. *Fortifying China* explores the titanic struggle to turn China into an aspiring world class military technological power. The defense economy is leveraging the country's vibrant civilian economy and gaining access to foreign sources of technology and know how. Drawing on extensive Chinese language sources, Tai Ming Cheung explains that this transformation has two key dimensions. The defense economy is being reengineered to break down bureaucratic barriers and reduce the role of the state, fostering a more competitive and entrepreneurial culture to facilitate the rapid diffusion and absorption of technology and knowledge. At the same time, the civilian and defense economies are being integrated to form a dual use technological and industrial base. In Cheung's view, the Chinese authorities believe this strategy will play a key role in supporting long term defense modernization. For China's neighbors and the United States, understanding China's technological, industrial, and military capabilities is critical to the formulation of economic and security policies. *Fortifying China* provides crucial insight into the impact of China's dual use technology strategy. Cheung's systems of innovation framework considers the structure, dynamics, and performance of the defense economy from a systems level perspective.

**Measuring China's Science and Technology Progress** David A. Shlapak, Chad J. R. Ohlandt, Jon Schmid, 2024. The United States might get very little early warning of the specific science and technology S T programs that China could use to create important new military capabilities that the U S military might confront in the future. For this reason, a tool that could identify activity to develop these capabilities early in the pipeline is of immense interest to the military and intelligence communities. The authors developed the Military Advances in Science Technology framework for gaining insights in these areas. Its top down analytic approach begins with the China's leadership's strategic aspirations for China, works through the military missions implied by those goals, and identifies new or improved capabilities required to execute those missions. The authors specified the technological bases for these capabilities and explored Chinese S T activity as far back as the basic research phase. This resulted in a graphical dashboard backed by qualitative and quantitative data which indicates the status and trends of China's progress in these S T domains. The indicators supplied by this framework can focus U S research and development objectives and shape modernization priorities, point the intelligence community to new areas of China's S T activity, and assist in allocating intelligence assets and resources effectively. facilitate combatant commands and Pentagon planners in assessing the potential results of China's S T

undertakings and help the U S Department of Defense DoD inform its governmental academic and industrial partners about S T areas in which caution should be exercised in both Chinese investment in U S firms and collaboration with Chinese researchers

**Interpreting China's Military Power** Ka Po Ng,2005-08-09 Although inter state tensions have generally been easing after the Cold War military power remains a dominant factor in Asian regional politics As China operating the world s largest army grows stronger there are ongoing debates over the implications for Asia s regional security This book argues that it is imperative to look beyond the empirical observations and conventional materialist reading of Chinese military development to understand its dynamics and directions in doctrinal terms and put it in a readiness context for evaluation Military doctrine has long been under studied and is often treated as a subject separate from force development But as this study contends this factor is necessary for interpreting the making and purposes of China s military power because it forms the intellectual foundation of military structural and hardware development When loaded with political rhetoric it also communicates to us the intended uses of the military power The role of doctrine is reinforced in the context of military readiness which defines what for and how the army is getting ready Force development is evaluated in structural operational and directional terms The importance of this analytical framework based on military doctrine and readiness is demonstrated in a survey of the evolution of Chinese military doctrine and force development As the Chinese People s Liberation Army has continued to adjust its military structure and operation to follow the doctrinal lead its switches between the doctrines of local war and total war have seen corresponding changes to the emphasis between operational and structural readiness

The Fourth Industrial Revolution and Military-Civil Fusion Yoram Evron,Richard A. Bitzinger,2023-06-15 Advanced commercial technologies offer new opportunities for defense applications that could greatly affect military power and metrics of military advantage This is relevant when it comes to civilian based technological innovations found in the emerging fourth industrial revolution such as artificial intelligence autonomous systems big data and quantum computing Militaries and governments around the world are increasingly focused on how and where advanced commercial technologies innovations and breakthroughs could potentially create new capacities for military power advantage and leverage This process of exploiting civilian based advanced technologies is referred to as military civil fusion MCF This book addresses MCF not only from a conceptual and practical sense but also comparatively as it explores how four different countries the United States China India and Israel are attempting to use MCF to support national military technological innovation It will interest scholars researchers and advanced students of military security and technology studies as well as analysts and policymakers in military and defense organizations

**China's Military Procurement in the Reform Era** Yoram Evron,2015-06-26 The decisions that shape the policy of weapons procurement are an important area of national security policy This is all the more true for China which during recent decades has vacillated between different sources and directions of military build up This book explores the politics of military procurement in China under the successive leaderships of Deng

Xiaoping Jiang Zemin and Hu Jintao It shows how China's political and military leaders have sought to adjust military procurement policy to meet China's strategic objectives to relate it to non military needs to strike a balance between the import of weapons and indigenous production and to determine the connections between hardware and other components of military power Exploring in detail five major shifts in the nation's military procurement it traces the considerations and negotiations among China's civilian and military leaderships By doing so it offers both a conceptual framework and empirical grounds for evaluating the factors that shape China's military procurement directions as well as their limitations prospects and operational implications As the first book to study comprehensively and systematically the attributes shaping China's military procurement it will be of great interest to students and scholars of Chinese politics Chinese history and military and strategic studies     Getting to Innovation Tai Ming Cheung, Kevin Pollpeter, 2014-01-31     **A New Direction for China's Defense Industry** Evan S. Medeiros, Roger Cliff, Keith Crane, James C. Mulvenon, 2005-12-19 Since the early 1980s a prominent and consistent conclusion drawn from research on China's defense industrial complex has been that China's defense production capabilities are rife with weaknesses and limitations This study argues for an alternative approach From the vantage point of 2005 it is time to shift the focus of current research to the gradual improvements in and the future potential of China's defense industrial complex The study found that China's defense sectors are designing and producing a wide range of increasingly advanced weapons that in the short term are relevant to a possible conflict over Taiwan but also to China's long term military presence in Asia Part of a larger RAND Project AIR FORCE study on Chinese military modernization this study examines the current and future capabilities of China's defense industry The goals of this study are to 1     Modernizing China's Military David Shambaugh, 2003-03-25 David Shambaugh a leading international authority on Chinese strategic and military affairs offers the most comprehensive and insightful assessment to date of the Chinese military The result of a decade's research Modernizing China's Military comes at a crucial moment in history one when international attention is increasingly focused on the rise of Chinese military power Basing his analysis on an unprecedented use of Chinese military publications and interviews with People's Liberation Army PLA officers Shambaugh addresses important questions about Chinese strategic intentions and military capabilities questions that are of key concern for government policymakers as well as strategic analysts and a concerned public
