## **Formations Of The Secular Formations Of The Secular:**

**Formations of the Secular** Talal Asad, 2003-02-03 A dark but brilliantly original work one of the most important books on religion and the modern in recent years H Net Reviews Opening with the provocative query what might an anthropology of the secular look like this book explores the concepts practices and political formations of secularism with emphasis on the major historical shifts that have shaped secular sensibilities and attitudes in the modern West and the Middle East Talal Asad proceeds to dismantle commonly held assumptions about the secular and the terrain it allegedly covers He argues that while anthropologists have oriented themselves to the study of the strangeness of the non European world and to what are seen as non rational dimensions of social life things like myth taboo and religion the modern and the secular have not been adequately examined The conclusion is that the secular cannot be viewed as a successor to religion or be seen as on the side of the rational It is a category with a multi layered history related to major premises of modernity democracy and the concept of human rights This book will appeal to anthropologists historians religious studies scholars as well as scholars working on modernity A difficult if stunningly eloquent book a response both elusive and forthright to the many shelves of books on terrorism which this country's trade publishers are rushing into print Bryn Mawr Review of Comparative Literature This wonderfully illuminating book should be read alongside the author's *Genealogies of Religion* Religion One of the most interesting scholars of religious writing today Christian Scholar's Review Asad's brilliant study remains a defining piece of intellectual and scholarly contribution for all of those interested in exploring the religious and the secular in the modern era The American Journal of Islamic Social Sciences [Formations of the Secular](#), 2003 **Formations of the Secular** Talal Asad, 2003-02-03 Opening with the provocative query what might an anthropology of the secular look like this book explores the concepts practices and political formations of secularism with emphasis on the major historical shifts that have shaped secular sensibilities and attitudes in the modern West and the Middle East Talal Asad proceeds to dismantle commonly held assumptions about the secular and the terrain it allegedly covers He argues that while anthropologists have oriented themselves to the study of the strangeness of the non European world and to what are seen as non rational dimensions of social life things like myth taboo and religion the modern and the secular have not been adequately examined The conclusion is that the secular cannot be viewed as a successor to religion or be seen as on the side of the rational It is a category with a multi layered history related to major premises of modernity democracy and the concept of human rights This book will appeal to anthropologists historians religious studies scholars as well as scholars working on modernity *Islam and Secularism in Post-Colonial Thought* Hadi Enayat, 2017-06-30 This book is a theoretically and historically informed exploration of secularism in Muslim contexts It does this through a critical assessment of an influential tradition of thinking about Islam and secularism derived from the work of anthropologist Talal Asad and his followers The study employs the tools of comparative historical sociology and sociology of knowledge to engage with the assumptions of Asadian theory Ultimately

Enayat argues against nativist assertions drawn from the experience of Western modernity and provides a qualified defense of secularism

**Secular Translations** Talal Asad, 2018-12-04 In *Secular Translations* the anthropologist Talal Asad reflects on his lifelong engagement with secularism and its contradictions. He draws out the ambiguities in our concepts of the religious and the secular through a rich consideration of translatability and untranslatability, exploring the circuitous movements of ideas between histories and cultures. In search of meeting points between the language of Islam and the language of secular reason, Asad gives particular importance to the translations of religious ideas into nonreligious ones. He discusses the claim that liberal conceptions of equality represent earlier Christian ideas translated into secularism, explores the ways that the language and practice of religious ritual play an important but radically transformed role as they are translated into modern life, and considers the history of the idea of the self and its centrality to the project of the secular state. Secularism is not only an abstract principle that modern liberal democratic states espouse, he argues, but also a range of sensibilities. The shifting vocabularies associated with each of these sensibilities are fundamentally intertwined with different ways of life. In exploring these entanglements, Asad shows how translation opens the door for or requires the utter transformation of the translated. Drawing on a diverse set of thinkers ranging from al-Ghazali to Walter Benjamin, *Secular Translations* points toward new possibilities for intercultural communication, seeking a language for our time beyond the language of the state.

***Formations of Belief*** Philip Nord, Katja Guenther, Max Weiss, 2019-09-17 For decades, scholars and public intellectuals have been predicting the demise of religion in the face of secularization. Yet religion is undergoing an unprecedented resurgence in modern life, and secularization no longer appears so inevitable. *Formations of Belief* brings together many of today's leading historians to shed critical light on secularism's origins, its present crisis, and whether it is as antithetical to religion as it is so often made out to be. *Formations of Belief* offers a more nuanced understanding of the origins of secularist thought, demonstrating how Reformed Christianity and the Enlightenment were not the sole vessels of a worldview based on rationalism and individual autonomy. Taking readers from late antiquity to the contemporary era, the contributors show how secularism itself can be a form of belief, and yet how its crisis today has been brought on by its apparent incapacity to satisfy people's spiritual needs. They explore the rise of the humanistic study of religion in Europe, Jewish messianism, atheism, and last rites in the Soviet Union, the cult of the saints in colonial Mexico, religious minorities, and Islamic identity in Pakistan, the neuroscience of religion, and more. Based on the Shelby Cullom Davis Center Seminars at Princeton University, this incisive book features illuminating essays by Peter Brown, Yaacov Dweck, Peter E. Gordon, Anthony Grafton, Brad S. Gregory, Stefania Pastore, Caterina Pizzigoni, Victoria Smolkin, Max Weiss, and Muhammad Qasim Zaman.

**Religion and the Secular** Timothy Fitzgerald, 2014-12-05 Religion has dominated colonialism since the 16th century. Religion and the Secular critically examines how religion has been used to subject indigenous concepts to the needs of colonial powers. Essays present the colonial relationship from the perspective of colonized cultures, including Mexico.
