Disability Reader Disability Reader:

The Disability Studies Reader Lennard J. Davis, 2006 The second edition of The Disability Studies Reader builds and improves upon the classic first edition which has sold well over 6000 copies since 1999 As a field disability studies burst onto the scene across the social sciences and humanities in the 1990s and the first edition of the reader gathered the best work that had been written on the subject including essays by famous authors such as Susan Sontag and Erving Goffman The new edition is more global in its coverage and adds material on genetic testing the human genome queer studies and issues in developing countries The size of the audience has grown since the first edition's publication and the second edition's new material will make it even more useful for courses on the subject Courses on the subject have mushroomed in the past ten years and can now be found across the social sciences humanities and behavioral sciences

The Disability Studies Reader Lennard J. Davis, 2013-05-02 The Fourth Edition of the Disability Studies Reader breaks new ground by emphasizing the global transgender homonational and posthuman conceptions of disability Including physical disabilities but exploring issues around pain mental disability and invisible disabilities this edition explores more varieties of bodily and mental experience New histories of the legal social and cultural give a broader picture of disability than ever before Now available for the first time in eBook format 978 0 203 07788 7

The Disability Studies Reader Lennard J. Davis, 1997 The Disability Studies Reader collects for the first time representative texts from the newly emerging field of disability studies This volume represents a major advance in presenting the most important writings about disability with an emphasis on those writers working from a materialist and postmodernist perspective Drawing together experts in cultural studies literary criticism sociology biology the visual arts pedagogy and post colonial studies the collection provides a comprehensive approach to the issue of disability Contributors include Erving Goffman Susan Sontag Michelle Fine and Susan Wendell

Another Disability Studies Reader? Geert Van Hove, 2005

The Disability Reader Tom Shakespeare, 2000

Disability Reader Tom Shakespeare, 1998-09-23 A collection of essays exploring the intellectual implications of a disability equality perspective Leading social scientists draw on current theory and research and offer an overview of contemporary debates

Rethinking Normalcy Rod Michalko, Tanya Titchkosky, 2009

Disability and Society Renu Addlakha, 2009 In the 1980 s disabled scholars in the West began to develop a radical critique of biomedical conceptions of disability that focused exclusively on the individual body and its limitations They also exposed the failure of the social sciences to critically address what this medical understanding of disability meant and what it excluded from consideration Out of their work emerged what is generally called the social model of disability Over the past twenty years this perspective has generated a substantial literature much of it making use of the methods of qualitative social research Narratives and life histories produced by disabled people themselves have a central place in the Disability Studies literature This work has major implications for professionals in the rehabilitation field for the social sciences and the ultimate goal for the full integration of disabled people into society

However almost all of it focuses on the traditions practices and dilemmas of northern countries In India in Thailand and in most of Asia the field of disability continues to be dominated by the biomedical model Thus disability is understood as an incurable chronic illness and increasingly an object for medical diagnosis and investigation Despite many positive developments little convergence between disability politics and practice on the one hand and sociology and anthropology on the other has taken place Surveying the international literature on disability and rehabilitation it becomes apparent that many studies carried out in Asian countries are designed to measure the extent of unmet need or the impact of services or attitudes to disabled people Virtually no studies make use of the innovative usually qualitative and often holistic approaches developed in Western countries over the past twenty years This book introduces readers in Asian countries to the recent disability literature of the West The editors hope that it will inspire new thinking among social scientist rehabilitation professionals and organizations of disabled people themselves that could further the empowerment of people with disabilities

Disability, Space, Architecture: A Reader Jos Boys, 2017-02-17 Disability Space Architecture A Reader takes a groundbreaking approach to exploring the interconnections between disability architecture and cities The contributions come from architecture geography anthropology health studies English language and literature rhetoric and composition art history disability studies and disability arts and cover personal theoretical and innovative ideas and work Richer approaches to disability beyond regulation and design guidance remain fragmented and difficult to find for architectural and built environment students educators and professionals By bringing together in one place some seminal texts and projects as well as newly commissioned writings readers can engage with disability in unexpected and exciting ways that can vibrantly inform their understandings of architecture and urban design Most crucially Disability Space Architecture A Reader opens up not just disability but also ability dis ability as a means of refusing the normalisation of only particular kinds of bodies in the design of built space It reveals how our everyday social attitudes and practices about people objects and spaces can be better understood through the lens of disability and it suggests how thinking differently about dis ability can enable innovative and new kinds of critical and creative architectural and urban design education and practice [The Disability Bioethics Reader](#) Joel Michael Reynolds, Christine Wieseler, 2022-05-30 The Disability Bioethics Reader is the first introduction to the field of bioethics presented through the lens of critical disability studies and the philosophy of disability Introductory and advanced textbooks in bioethics focus almost entirely on issues that disproportionately affect disabled people and that centrally deal with becoming or being disabled However such textbooks typically omit critical philosophical reflection on disability Directly addressing this omission this volume includes 36 chapters most appearing here for the first time that cover key areas pertaining to disability bioethics such as state of the field analyses of modern medicine bioethics and disability theory health disease and the philosophy of medicine issues at the edge and end of life including physician aid in dying brain death and minimally conscious states enhancement and biomedical technology invisible disabilities chronic pain and chronic illness

implicit bias and epistemic injustice in health care disability quality of life and well being race disability and healthcare justice connections between disability theory and aging trans and fat studies prenatal testing abortion and reproductive justice The Disability Bioethics Reader unlike traditional bioethics textbooks also engages with decades of empirical and theoretical scholarship in disability studies scholarship that spans the social sciences and humanities and gives serious consideration to the history of disability activism

Disability in the Christian Tradition Brian Brock, John

Swinton, 2012-08-06 For two millennia Christians have thought about what human impairment is and how faith communities and society should respond to people with perceived impairments But never has one volume collected the most significant Christian writings on disability This book fills that gap Brian Brock and John Swinton's Disability in the Christian Tradition brings together for the first time key writings by thinkers from all periods of Christian history including Augustine Aquinas Julian of Norwich Luther Calvin Hegel Kierkegaard Bonhoeffer Barth Hauerwas and more Fourteen contemporary experts in theology and disability studies guide readers through each era or group of thinkers offering clear commentary and highlighting important themes

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches

Interpreting Disability Philip M. Ferguson, Dianne L. Ferguson, Steven J. Taylor, 1992 What is so exciting about the recent popularity of qualitative research in disability studies Does the use of this type of inquiry in special education and rehabilitation really promise a fundamental shift in our understanding of disability as a personal experience and a social construction or is it simply a fad that will gradually subside into just one more research technique among many This book attempts to answer these questions by practical example rather than by methodological debate For those interested in the use of qualitative research in the study of disability this book should provide an excellent

starting point for sampling the range and vitality of this approach Shakespeare and Disability Studies Sonya Freeman Loftis, 2021-04-08 Shakespeare and Disability Studies argues that an understanding of disability theory is essential for scholars teachers and directors who wish to create more inclusive and accessible theatrical and pedagogical encounters with Shakespeare's plays Previous work in the field of early modern disability studies has focused largely on Renaissance characters that a modern audience might view as disabled This volume argues that the conception of disability as residing within individual literary characters limits understandings of disability in Shakespeare by theorizing disability vis a vis characters previous studies have largely overlooked readers performers and audience members who self identify as disabled Focusing on issues such as accessible performances inclusive casting and Shakespeare based therapy Shakespeare and Disability Studies reinvigorates textual approaches to disability in Shakespeare by reading accessibility as an art form and exploring both the powers and potential limits of universal design in theatrical performance The book examines the complex interdependence among the concepts of theory access and inclusion demonstrating the crucial role of disability theory in building access and examining the ways that access may both open and foreclose inclusive dramatic practice Shakespeare and Disability Studies challenges Shakespearians from students to audience members from classroom teachers to theatre practitioners to consider how Shakespeare as industry as high art and as cultural symbol impacts the lived reality of those with disabled bodies and or minds Still Living the Edges Diane Driedger, 2021 Still Living the Edges A Disabled Women's Reader is a follow up to Diane Driedger's 2010 anthology Living the Edges A Disabled Women's Reader Ten years after the publication of the first book the lives of women with disabilities have not changed much as disabled women still face discrimination because they are women and because they are disabled Still Living the Edges is an international reader that features articles poetry essays and visual art from women with various disabilities from nations such as Canada United States Australia Russia United Kingdom and Zimbabwe Disabled women are still on the edges whether that be on the cutting edge being pushed to the edges of society or challenging the edges the barriers in their way This collection brings together the diverse voices of women with various disabilities both physical and mental Disabled women write about their experiences with violence employment relationships body image sexuality and family life society's attitudes and physical sexual and emotional abuse They also talk about the challenges of navigating inaccessible environments both physical and attitudinal They explore their identity as women with various disabilities mental and physical In the last section of Still Living the Edges disabled women write about how they are challenging the physical and attitudinal barriers that exclude them from society
