Fortuitous Encounters Wisdom Stories For Learning And Growth:

Fortuitous Encounters Paul Davis, Larry C. Spears, 2013 We have all experienced fortuitous encounters those moments in our lives where a person place or thing caused our lives to change in a more positive direction Our lives are full of what some have called serendipity strange acts of fortune or causeless miracles A favorite teacher inspires our choice of career a chance encounter develops into love marriage and a new family At the time we are most in need of a friend one appears in our lives We look at a mountain or the ocean and find meaning and peace we read a book and an idea is planted in our brains that provides the wisdom we seek The ability to experience fortuitous encounters is key to learning and growth The more fortuitous encounters someone has the better the odds are the person is successful and happy While fortuitous encounters are by their very nature a product of chance that is beyond our ability to control Davis and Spears strongly believe as did Pasteur that chance favors only the prepared mind The intention is not to try to explain chance or divine intervention in this book but simply to help the reader whatever their core beliefs to understand the power of fortuitous encounters In this book you will read firsthand reports of fortuitous encounters of many kinds These true stories can help you to learn how to prepare yourself to experience your own fortuitous encounters and experience a lifetime of learning and growth This wise book will serve as a great companion to help you stay awake to the fortuitous people places and things that ultimately shape your days and your life

The Creative Retrieval of Saint Thomas Aquinas W. Norris Clarke, 2009-08-25 W Norris Clarke has chosen the

fifteen essays in this collection five of which appear here for the first time as the most significant of the more than seventy he has written over the course of a long career Clarke is known for his development of a Thomistic personalism To be a person according to Saint Thomas is to take conscious self possession of one s own being to be master of oneself But our incarnate mode of being human involves living in a body whose life unfolds across time and is inevitably dispersed across time If we wish to know fully who we are we need to assimilate and integrate this dispersal so that our lives become a coherent story In addition to the existentialist thought of Etienne Gilson and others Clarke draws on the Neoplatonic dimension of participation Existence as act and participation have been the central pillars of his metaphysical thought especially in its unique manifestation in the human person The essays collected here cover a wide range of philosophical ethical religious and aesthetic topics Through them sounds a very personal voice one that has inspired generations of students and scholars

Babich,2013-06-29 perceptual essences that can be rendered directly manifest in perception with the help of theoretically structured instruments serving as readable technologies Scientific knowledge should thus be understood as an extension of unassisted perception A perceptual fact has an outer horizon which separates it from the ground on which it appears and an inner horizon composed of a multiplicity of possible perceptual profiles organized by an invariant essence The perceiving subject can bring forth a representative sample of the profiles in question occasionally by making use of certain technological processes which are themselves subject to interpretation in terms of theoretical representations The theoretical entities described in these representations are not simply detected thanks to an inferential operation but rather they are directly perceived It follows from this that the correspondence between the manifest image and the scientific image is not done one to one but by a many to one or one to many application between contextually defined perceptual objects within contexts that are mutually incompatible but complementary This should not however be understood as a form of conventionalism nor as a form of cultural relativism Pre comprehension which guides interpretation imposes strict limits to the descriptive categories which can be used and to the manner in which they can be linked to appropriate empirical objects The author applies his hermeneutic principles to the study of visual perception In fact this question is treated in the first part of the book **Wisdom Stories.
