Murthy, T.V.S. Arun, 2008 Electromagnetic Fields Modified Maxwell Equations in Quantum Electrodynamics Henning F.
Harmuth, Terence William Barrett, Beate Meffert, 2001 Divergencies in quantum field theory referred to as OC infinite zero
point energy OCO have been a problem for 70 years Renormalization has always been considered an unsatisfactory remedy In
1985 it was found that Maxwell's equations generally do not have solutions that satisfy the causality law An additional term
for magnetic dipole currents corrected this shortcoming Rotating magnetic dipoles produce magnetic dipole currents just as
rotating electric dipoles in a material like barium titanate produce electric dipole currents Electric dipole currents were
always part of Maxwell's equations This book shows that the correction of Maxwell's equations eliminates the infinite zero
point energy in quantum electrodynamics In addition it presents many more new results Contents Monopole Dipole and
