 Mammals Rafael Reyna-Hurtado, Colin A. Chapman, 2019-01-08 This book brings a unique perspective to animal movement  
 studies because all cases came from tropical environments where the great diversity either biological and structurally trees  
 shrubs vines epiphytes presents the animal with several options to fulfill its live requirements These conditions have forced  
 the evolution of unique movement patterns and ecological strategies Movement is an essential process in the life of all  
 organisms Animals move because they are hungry thirsty to avoid being eaten or because they want to find mates  
 Understanding the causes and consequences of animal movement is not an easy task for behavioural ecologists Many animals  
 are shy move in secretive ways and are very sensible to human presence therefore studying the movements of mammals in  
 tropical environments present logistical and methodological challenges that have recently started to be solved by ecologist  
 around the world In this book we are compiling a set of extraordinary cases where researchers have used some of the modern  
 technology and the strongest methodological approaches to understand movement patterns in wild tropical mammals We  
 hope this book will inspire and encourage young researchers to investigate wild mammal s movements in some of the  
 amazing tropical environments of the world      **Terry's Mexico** Thomas Philip Terry, 1909      **Standard and Poor's 500
